PREFACE

This is the tenth edition of the *California Statistical Abstract,* a compilation of data on social, political, economic and physical aspects of the State. The volume is a cooperative effort of various state agencies and several private organizations, noted in the Appendix on pages 213–214. Material is edited by the California Department of Finance, Budget Division, Financial and Population Research Section. Additional information may be obtained from the agencies cited in source notes. If more specific information is desired, users are welcome to write to the Department of Finance, Room 1145, State Capitol, Sacramento, California 95814. Requests will be forwarded to the appropriate agency for reply.

The Department of Finance welcomes suggestions for improvement of the *Abstract,* and ways in which it may be developed into an even more useful compilation of data series on the State.

CONTENTS

Section		Page
Introduction		vii
A. Area, Geography and Climate		1
	Land area—Government property—State parks—Elevations—climatological data	
B. Population		9
	Population of the State—Population for counties and cities	
C. Labor Force and Employment		17
	Civilian labor force and employment—Nonagricultural wage and salary employment—Covered employment—Unemployment—Hours and earnings—Work injuries—Workmen's compensation—Union membership—Work stoppages—Employment service placements—Manpower training	
D. Income and Cost-of-Living		49
	Bank and corporation income—Personal income—Personal tax returns—Consumer price indices	
E. Health and Welfare		61
	Vital statistics—public health—Prison population—Youth authority wards—Vehicle code violations—Unemployment insurance activities—Disability insurance activities—Public assistance expenditures—Mentally ill and retarded	
F. Education		93
	Educational attainment—School personnel—Expense of education—Average daily attendance—Enrollments—Graduates—Locations of institutions	
G. Resource Industries		99
	Water conditions—Irrigated farm land—Dams and reservoirs—State water project—Agriculture—Farms—Crop production—Cash receipts—Leading commodities—Forestry—Lumber production—Fishing—Fish landings—Mineral production	
H. Manufacturing		129
	Employment—Payroll—Value added—Capital expenditures	
I. Defense-Aerospace		133
	Prime contract awards—Major contractors—Employment—Scientists	
J. Construction		135
	Nonresidential building permits—Residential permits	
K. Transportation		139
	Highway mileage—Construction expenditures—Motor vehicle fuel gallonage—Traffic entering California—Registrations—Drivers' licenses—Driver control actions—Accidents—Transportation revenues—Foreign trade—Waterborne cargo—Airborne trade—Airport activity	
L. Public Utilities		151
	Electricity production and use—Natural gas—Number of telephones—Average monthly utility bills	

CONTENTS—Continued

Section		Page
M. Trade and Services	Wholesale trade—Retail trade—Taxable sales—Services	155
N. Banking and Finance	Bank deposits—Savings and loan association assets and loans—Bank loans—Insurance premiums written	183
O. Public Finance	Internal revenue collections—Federal aid payments—State revenues and expenditures—Private car tax assessments—Assessed valuation of property—Financial transactions concerning counties, cities, school and special districts—State bonds outstanding	185
P. Elections	Registration—Vote cast—Voting precincts	199
Q. Comparative Statistics	Data for the 50 states—Population—Employment—Hours and earnings — Income — Defense-aerospace contracts — Manufacturing — Trade and services—Agriculture	207
Appendix: Contributors		213
Index		215

INTRODUCTION

California covers 158,693 square miles between the 32nd and 42nd parallels north latitude on the Pacific Coast. The State is well known for its temperate climate which has attracted millions of people to the coastal cities. Los Angeles-Long Beach ranks as the third largest metropolitan area in the United States, and San Francisco-Oakland as the sixth. California includes Mount Whitney, the highest peak in the contiguous United States, at 14,495 feet above sea level, and Death Valley, 282 feet below sea level, the lowest point in the Western Hemisphere. The average July maximum temperature ranges from 64 degrees in San Francisco to 107 in Imperial County.

Population—California's population has doubled every 20 years since 1860. Since 1965, the increase has been about 909 persons per day. In the last decade, civilian population has increased approximately 454,600 per year on the average. The State's population as of July 1, 1969 was 19,834,000, up 283,000 or 1.0 percent, from the mid-1968 level.

California is one of the most urbanized states in the Nation. At the time of the Census of 1960, only the District of Columbia, whose population was 100 percent urban, and New Jersey, with 88.6 percent, exceeded Rhode Island and California which were virtually tied at 86.4 percent urban.

California has a smaller proportion of residents 65 years or older than does the United States as a whole, and somewhat larger proportion of the working ages from 20 to 65.

Labor force and employment—California's civilian labor force averaged 8,090,000 during 1968, a gain of 257,000, or 3.3 percent, from 1967. During the past ten years the relative growth in the State has been more than twice that of the Nation—37.0 percent compared with 16.4 percent.

Civilian employment increased by 281,000 to 7,725,000 in 1968. Unemployment averaged 366,000, or 4.5 percent of the labor force.

Personal income—Personal income of California residents reached $77.0 billion in 1968, 11.0 percent of all U.S. income allocated by states. Two-thirds of the total was received as wages and salaries. Manufacturing is the largest source of income, accounting for one-fourth of the total derived from participation in current production. Trade is second in importance, followed by the service industries and government.

Corporate income—Net income of $5.25 billion from California operations was reported by the 125,677 banks and corporations operating in the State during 1967. Manufacturing industries accounted for approximately 43 percent of the total.

Manufacturing—California has the second largest manufacturing complex in the Nation. According to the 1967 Census of Manufactures, value added during that year amounted to $23.1 billion. The State's aerospace industry is the largest in the U.S., and claims nearly 18 percent of all defense contracts, in addition to substantial production for the civilian sector.

Agriculture—California continues to be the Nation's leading agricultural producer. Cash receipts received by California farmers during 1968 totaled $4.4 billion, $348 million above the 1967 level. Sales of all crops were an estimated $2.5 billion and accounted for 56 percent of total receipts. Livestock products earned $1.6 billion or 37 percent.

Metropolitan areas—Much of the data in this *Abstract* are reported for the 14 Standard Metropolitan Statistical Areas (SMSA's) in the State. The table below summarizes the counties in each area. In addition, the map on page XI shows the areas graphically.

Metropolitan area	*County*
Anaheim-Santa Ana-Garden Grove	Orange
Bakersfield	Kern
Fresno	Fresno
Los Angeles-Long Beach	Los Angeles
Oxnard-Ventura	Ventura
Sacramento	Placer, Sacramento and Yolo
San Bernardino-Riverside Ontario	San Bernardino and Riverside
San Diego	San Diego
San Francisco-Oakland	Alameda, Contra Costa, Marin, San Francisco, and San Mateo
San Jose	Santa Clara
Santa Barbara	Santa Barbara
Stockton	San Joaquin
Vallejo-Napa	Napa and Solano
Salinas-Monterey	Monterey

The metropolitan areas cover 43.8 percent of the State's area, and include 90.5 percent of the population.

CALIFORNIA
TOPOGRAPHICAL FEATURES

SECTION A.

AREA, GEOGRAPHY AND CLIMATE

This section summarizes data relating to the land and water areas of the State, temperature and precipitation. The basic sources of these data are the federal agencies responsible for surveying and mapping the United States and for recording its weather. Information on federal and state parks and monuments is reported by various government agencies.

The plate on page 8 shows the geographical pattern of precipitation throughout California, as indicated by lines of equal normal annual precipitation. These lines generalize records and estimates for a large number of weather stations in all parts of the State.

The introduction to Section G, Resource Industries, also includes a generalized description of precipitation in California during the water year 1967–68.

TABLE A-1

AREA OF CALIFORNIA

Type	Square miles	Acres
Gross area of State	158,693	101,563,520
Land area [a]	156,537	100,183,680
Inland water [b]	2,156	1,379,840
Coastal water [c]	69	44,160

[a] Dry land and land temporarily or partially covered by water, such as marshland, swamps, and river flood plains; streams, sloughs, estuaries, and canals less than one-eighth of a statute mile in width; and lakes, reservoirs, and ponds less than 40 acres of area.

[b] Permanent inland water surface, such as lakes, reservoirs, and ponds having 40 acres or more of area; streams, sloughs, estuaries, and canals one-eighth of a statute mile or more in width; deeply indented embayments and sounds, and other coastal waters behind or sheltered by headlands or islands separated by less than 1 nautical mile of water; and islands having less than 40 acres of area. Does not include water surface of the ocean or bays.

[c] Water other than inland water. Much of the water adjacent to the State and falling under its jurisdiction does not belong to any particular county. The State area as shown above includes only the water which could be assigned to the counties and subdivisions of the counties. The definition adopted by the Bureau of the Census, characterizes this water as "inland water."

TABLE A-3

LAND AREAS, BY MAJOR CLASS OF LAND 1964–65

Class of land	Acres
Total	100,185,000
Forest land	42,416,000
Commercial [a]	17,345,000
Public	9,253,000
Private	8,092,000
Productive-Reserved [b]	1,255,000
Unproductive [c]	23,816,000
Crop land [d]	11,815,000
Urban and suburban land [e]	2,200,000
Other land	43,754,000

[a] Forest land which is producing or capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation.
[b] Productive public forest land withdrawn from timber utilization through statute or administrative regulation.
[c] Forest land incapable of yielding crops of industrial wood because of adverse site conditions.
[d] As reported by 1964 Census of Agriculture. Excludes land cultivated in developing improved pasture.
[e] Residential areas containing at least 5 homes, with a density of one home or more on each two acres; industrial and commercial development, alone or in combination with residential development; and the actively occupied portions of military reservations—as determined by land and water use specialists of the Department of Water Resources.

TABLE A-8

ALTITUDES OF SELECTED CALIFORNIA PEAKS

Summit	Rank among California peaks	Feet above sea level	County location
Barnard, Mount	14	13,990	Inyo-Tulare
Langley, Mount	10	14,042	Inyo-Tulare
Middle Palisade	11	14,040	Fresno-Inyo
Muir, Mount	13	14,015	Inyo-Tulare
North Palisade	4	14,242	Fresno-Inyo
Russell, Mount	8	14,086	Inyo-Tulare
Shasta, Mount	5	14,162	Siskiyou
Sill, Mount	6	14,162	Fresno-Inyo
Split Mountain	9	14,058	Fresno-Inyo
Tyndall, Mount	12	14,018	Inyo-Tulare
White Mountain Peak	3	14,246	Mono
Whitney, Mount	1	14,494	Inyo-Tulare
Williamson, Mount[a]	2	14,375	Inyo

[a] The east peak of Mt. Williamson has an elevation of 14,125 feet, which gives it seventh rank among California peaks.

SECTION B.

POPULATION

The tables in this Section summarize available data on the population of the State of California, its counties and cities. Comparisons of California's population with the totals for the Pacific Division and the Nation are also shown.

All figures on the total population of California through 1949 and those for April 1, 1950 and April 1, 1960 are from publications of the United States Bureau of the Census, and represent decennial census counts or estimates prepared by that agency. All estimates of the civilian population and estimates of the total population for the years 1950 to 1969 were prepared by the Department of Finance and are based on the analysis of components of population change summarized in Table B-3. Data used in the preparation of these estimates have been obtained from the Bureau of Vital Statistics, Department of Public Health; the Bureau of Education Research, Department of Education; the State Selective Service System, the United States Department of Defense; and the United States Department of Commerce, Bureau of the Census.

The Department of Finance publishes annual reports on the State's population, presenting additional material which includes current estimates of the State and county populations. A series of periodic reports is published listing current estimates prepared by the Department at the request of various California cities.

Occasional reports of California's population composition are published as data become available.

TABLE B-2

SECTION C.

LABOR FORCE AND EMPLOYMENT

This section presents statistics relating to the civilian labor force of California, including employment, unemployment, hours of work, earnings, apprenticeship, work injuries, union membership, and work stoppages. Employment covered under the Unemployment Insurance provisions of the California Unemployment Insurance Code is regularly reported in *California Employment and Payrolls,* published quarterly by the Department of Employment. Agricultural employment covered *only* for purposes of Disability Insurance is regularly reported in *California Employment and Payrolls in Agricultural Labor,* also published quarterly by the Department of Employment. Current data on the civilian labor force, civilian employment and unemployment are published monthly in *Employment and Unemployment in California,* issued jointly by the Department of Industrial Relations and the Department of Employment. The Department of Industrial Relations, Division of Labor Statistics and Research, publishes monthly data on nonagricultural employment, average hours worked and average earnings in the *California Labor Statistics Bulletin;* monthly work injury statistics in *Work Injuries in California* and a detailed annual summary in *California Work Injuries;* annual union membership data in *Union Labor in California;* annual data on work stoppages in *Work Stoppages in California;* and information about collective bargaining practices and other industrial relations data in *California Industrial Relations Reports,* issued three or four times a year.

Labor force. The labor force represents the sum of civilian employment and unemployment as defined in the following paragraphs. Caution is urged in comparing the statistics of employment and unemployment contained in this section with those published by the United States Department of Labor. The figures are not strictly comparable because of differences in methods of collection as well as in definitions and concepts.

Total civilian employment. Representing an overall figure of total employment, civilian employment covers the estimated number of employees in nonagricultural establishments, as defined below, plus estimates of employers, own-account workers, unpaid family workers, domestic workers, and agricultural workers.

Nonagricultural employment. The statistics of nonagricultural employment are prepared by the Division of Labor Statistics and Research in cooperation with the United States Bureau of Labor Statistics, and are comparable with national estimates prepared by the United States Bureau of Labor Statistics and with State and area estimates prepared by other states. Excluded are domestic workers, employers, own-account workers, and unpaid family workers as well as agricultural workers. Government employment refers to civilian employees only.

The estimates cover all full- and part-time wage and salary workers (administrative, supervisory, sales, technical, and office personnel, and production workers) who worked during, or received pay for, any part of the pay period which includes the 12th of the month. Persons on an establishment payroll who are on paid holidays, paid sick leave, or paid vacations, or who work during a part of a specified pay period and are unemployed or on strike during the other part of the period are considered employed. Persons on the payroll of more than one establishment during the pay period are counted each time reported. On the other hand, persons who are laid off or are on leave without pay, who are on strike for the entire pay period, or who are hired but do not report to work during the pay period are not considered employed. Data for federal defense establishments generally refer to persons who worked on, or received pay for, the last day of the month; for federal nondefense establishments and state and local government, data relate to persons who received pay for any part of the pay period which includes the 12th of the month.

Agricultural employment. Estimates of employment in agriculture—including farmers, wage and salary workers, unpaid family workers, and foreign contract workers—are prepared by the California Department of Employment.

Other employment. Estimates of the number of employers, own-account workers, and unpaid family workers in nonagricultural industries and of domestic workers are prepared by the Department of Industrial Relations, Division of Labor Statistics and Research, based upon data derived from the U. S. Census of Population and upon various current series such as the number of sales tax permits, number of business and professional licenses, and other available information.

Unemployment. Estimates of unemployment are prepared by the California Department of Employment.

The term unemployment, as used in this series, means all persons who are in the labor market but who for the seven days in a given week have not done any work for pay or profit. To be counted as unemployed a person must be able to work, available for work, and looking for work.

The definition used is broadly comparable with that of the United States Bureau of the Census.

The estimates of unemployment represent the number unemployed during the week which includes the 12th of the month.

Components used in preparing estimates of total unemployment are (a) certified unemployment measured by weeks of unemployment insurance claimed under the California Unemployment Insurance Code minus partial and part-total weeks claimed, (b) estimated number of persons who have exhausted these benefits and remain unemployed, (c) estimated number of unemployed persons who could file for unemployment insurance compensation but do not file or delay filing a claim, (d) unemployed railroad workers as reported by the Railroad Retirement Board, (e) certified unemployment of federal workers covered under the provisions of the Unemployment Compensation for Federal Employees Act of 1954, (f) estimated unemployment among persons normally employed in industries not covered by unemployment insurance, such as agriculture, State and local government, domestic service, and most nonprofit institutions, and (g) estimated unemployment among recent entrants and re-entrants to the labor force and among the self-employed.

Unemployment rate. The unemployment rate represents the number of unemployed as a percent of the civilian labor force, i.e., the sum of the employed and the unemployed. The *seasonally adjusted unemployment rate* eliminates the influence of regularly recurring seasonal fluctuations which can be ascribed to weather, crop-growing cycles, holidays, vacations, regular industry model changeover periods, and the like, and, therefore, more clearly shows the underlying basic trend of unemployment.

Earnings and hours. The Division of Labor Statistics and Research compiles statistics of earnings and hours in manufacturing and selected nonmanufacturing industry groups in California as a whole and in thirteen major metropolitan areas of the State. These statistics of average weekly earnings, hourly earnings, and hours per week are derived from employment, payroll, and hours information reported by a representative sample of establishments in each industry group.

The averages are based upon data for full- and part-time workers who worked during or received pay for any part of the reported pay period in a given month (usually the week which includes the 12th of the month). Included in average earnings are overtime pay and premium wages for late shift work. Therefore, these data are not wage rates but are averages of gross earnings.

Work injuries. The work injury statistics are based upon reports of on-the-job injuries to workers employed in industries covered by the California Workmen's Compensation Act. These reports are filed with the Division of Labor Statistics and Research in compliance with provisions of the California Labor Code. Not covered by the California Workmen's Compensation Act are maritime workers, federal employees, and railroad workers in interstate commerce.

The number of fatal work injuries includes (1) deaths for which findings and award decisions are issued by the Workmen's Compensation Appeals Board; (2) deaths for which liability is accepted by the insurance carrier or self-insurer without Appeals Board determinations; (3) deaths for which compromise and release agreements are approved by the Appeals Board in which the sole issue is dependency; and (4) deaths for which the amount of compromise settlement either equals or exceeds the commuted value of a findings and award. All other deaths for which compromise and release settlements are approved are excluded from the work fatality statistics.

The statistics of insured payroll and workmen's compensation benefits are compiled by the California Inspection Rating Bureau, and are on a policy-year basis. The figures do not include the experience of self-insured private and government employers.

Statistics of payrolls and compensation benefits paid by private self-insurers, reported in earlier years, were not available past 1966 at the time the *Abstract* went to press. The table has therefore been omitted from the current edition. It is hoped that later data will permit publication of the table in future editions.

Union membership. California union membership figures are collected by the Division of Labor Statistics and Research by means of the annual Organized Labor Questionnaire.

All unions affiliated with the AFL-CIO or predecessor organizations are included in the membership survey. Unions not affiliated with the AFL-CIO are included if they are known to have written collective bargaining agreements with two or more different employers. Also included are unaffiliated unions with a written collective bargaining agreement with a single employer if the contract covers the employer's operations in more than one location in California and if the union has 1,000 or more members. Unions of government workers, which do not usually execute written collective bargaining agreements, are included if affiliated with the AFL-CIO. An unaffiliated union of government employees is included only if it has members in other states as well as in California.

Work stoppages. The statistics of work stoppages in California are collected by the Division of Labor Statistics and Research in cooperation with the United States Bureau of Labor Statistics.

Included are all known strikes and lockouts involving as few as six workers and lasting the equivalent of a full shift or longer. For statistical purposes a strike is defined as a temporary stoppage of work by a group of employees to express a grievance or to enforce a demand; a lockout is a temporary withholding of work from a group of employees by an employer (or group of employers) in order to induce them to accept the employer's terms. Each concerted action is counted as one stoppage, irrespective of the number of unions, employers, or establishments.

The number of *workers involved* includes all employees in establishments directly involved in a stoppage who are idle for a full shift or longer. Employees in other establishments who are unable to work because of material or service shortages, or for other reasons indirectly connected with the stoppage, are not counted among workers involved. The same worker can be counted more than once in the annual

total if he is involved in more than one stoppage during the year.

The number of *mandays idle* is obtained by multiplying the number of workers involved in a stoppage by the number of days or shifts they would normally have worked had there been no stoppage. Allowances are made for fluctuations in the number of workers involved during the period of the stoppage.

[a] Includes the employed and the unemployed available for work and seeking work.
[b] Includes wage and salary workers, employers, own-account workers, and unpaid family workers.
[c] Detail may not add to total because of rounding.
[d] Includes construction contractors and operative builders and their employees; does not include force-account and government construction workers.
[e] Excludes operative builders and their employees.
[f] Includes all civilian employees of federal, state, and local governments regardless of the activity in which the employee is engaged.

n.a. Not available.

[a] Employers not engaged in an exempt activity, who have one or more persons in their employ, and pay wages in excess of $100 during a calendar quarter are subject to the Code. Exempt employment is comprised of agricultural labor; interstate railroad employment; self-employed; Federal, State, and local government employment; domestic services in private homes; persons in the employ of certain nonprofit charitable, education, or religious organizations; persons in the employ of a son, daughter, or spouse; children under 21 employed by a parent; and certain other small groups of workers. Workers in exempt employment may be insured under provisions of the Code if the employer becomes a subject employer through elective coverage.

[b] Includes "operative builders."

[c] Excludes "operative builders."

[d] Omitted to avoid disclosure of confidential information.

NOTE: Industry division and county detail may not add to totals due to rounding.

[a] Does not include employers, own-account workers, unpaid family workers, domestic servants, and agricultural workers.
[b] Detail may not add to total because of rounding.
[c] Includes employees of construction contractors and operative builders; does not include force-account and government construction workers.
[d] Excludes employees of operative builders.
[e] Includes all civilian employees of Federal, State, and local governments regardless of the activity in which the employee is engaged.

Department of Industrial Relations
Division of Labor Statistics and Research

TABLE C-5

WAGE AND SALARY WORKERS [a] IN NONAGRICULTURAL ESTABLISHMENTS, BY INDUSTRY, CALIFORNIA, 1950–68

(In thousands)

Industry	1950	1955	1960	1961	1962	1963	1964	1965	1966	1967	1968
Total [b]	3,209.4	4,082.9	4,896.0	4,996.1	5,217.7	5,412.3	5,606.5	5,800.3	6,145.4	6,364.3	6,630.3

[a] Does not include employers, own-account workers, unpaid family workers, domestic servants, and agricultural workers.
[b] Detail may not add to total because of rounding.
[c] Includes employees of construction contractors and operative builders; does not include force-account and government construction workers.
[d] Excludes employees of operative builders.
[e] Includes all civilian employees of federal, state, and local governments regardless of the activity in which the employee is engaged.
[f] Employees of San Francisco City and County included in "city."
[g] Includes employees of state and local public schools.

San Francisco Oakland					
1960	109.37	95.28	86.23	91.18	82.56
1961	113.78	98.86	89.52	93.44	84.61
1962	117.90	101.99	92.33	94.96	96.01
1963	122.85	105.44	95.52	96.82	87.71
1964	126.01	110.00	100.32	99.54	90.71
1965	132.00	115.65	105.84	102.62	93.91
1966	136.80	117.80	107.70	101.90	93.17
1967	140.30	120.40	108.94	101.18	91.55
1968	150.08	126.60	113.71	101.85	91.48

[a] Based upon data for full-time and part-time production and related workers. Overtime pay and premium wages for late-shift work are included.

[b] After federal and state income taxes and old-age and disability insurance deductions.

[c] Net spendable earnings adjusted for changes in the Consumer Price Index. The Consumer Price Index is compiled by the U.S. Bureau of Labor Statistics for the Los Angeles-Long Beach and the San Francisco-Oakland metropolitan areas. The index for California is a weighted average of these two areas.

TABLE C-14

AVERAGE HOURS AND EARNINGS OF PRODUCTION WORKERS IN MANUFACTURING, BY INDUSTRY, METROPOLITAN AREAS, 1968 [a]

Metropolitan area and industry	Average weekly hours	Average weekly earnings	Average hourly earnings
Los Angeles-Long Beach			
Total manufacturing	40.6	$136.82	$3.37
Total nondurable goods	39.1	123.95	3.17
Food and kindred products	39.8	139.30	3.50
Fish canning and preserving	35.5	94.79	2.67
Meat products	41.2	153.68	3.73
Dairy products	40.7	162.80	4.00
Fruit and vegetable canning and preserving	40.8	119.95	2.94
Grain mill products	47.4	148.84	3.14
Bakery products	37.5	144.75	3.86
Beverages	40.2	171.25	4.26
Textile mill products	41.5	107.07	2.58
Apparel and other textile products	36.8	86.48	2.35
Men's and boys' furnishings	36.6	81.62	2.23
Women's and misses' outerwear	36.3	88.21	2.43
Women's and children's undergarments	37.2	75.14	2.02
Paper and allied products	41.3	133.36	3.35
Miscellaneous converted paper products	40.5	129.60	3.20
Paperboard containers and boxes	41.8	141.70	3.39
Printing and publishing	36.9	146.86	3.98
Newspapers	34.1	159.25	4.67
Chemicals and allied products	41.2	135.14	3.28
Industrial chemicals	41.9	153.35	3.66
Plastics materials and synthetics	43.0	144.48	3.36
Drugs	40.5	119.48	2.95
Paints and allied products	41.4	141.59	3.42
Petroleum refining and related industries	42.2	164.16	3.89
Petroleum refining	41.8	162.18	3.88
Rubber and plastics products	41.5	124.09	2.99
Rubber footwear and other fabricated rubber products	40.5	112.19	2.77
Miscellaneous plastics products	40.5	104.09	2.57
Leather and leather products	37.3	86.91	2.33
Total durable goods	41.2	142.14	3.45
Lumber and wood products	39.3	120.65	3.07

[a] Averages are based upon data for full-time and part-time production and related workers in production and other departments, such as shipping, maintenance, and warehousing. Average weekly hours include overtime hours. Overtime hours are hours in excess of regular hours and for which overtime premiums are paid. Average gross hourly earnings include overtime pay and premium wages for late-shift work. Hourly earnings, excluding overtime, are derived on the assumption that overtime hours are paid at the rate of time and one-half.

[a] Excludes experience of self-insured employers. There were approximately 360 self-insured employers in 1966.

[b] "Policy year basis": Losses originating under policies effective in a given year are assigned to that year regardless of accident date.

[c] Losses incurred are estimated ultimate loss costs and include not only the amount paid as of the valuation date, but also include estimated amounts to be paid in the future. Detail may not add to total because of rounding.

[d] Includes both temporary and permanent disability indemnity costs in cases involving permanent disability.

TABLE C-19

DISABLING WORK INJURIES,[a] CALIFORNIA, 1950–68

Year	Total	Fatal [b]	Nonfatal
1950	136,814	691	136,123
1955	146,092	767	145,325
1960	158,663	811	157,852
1961	162,055	832	161,223
1962	166,008	1,023	164,985
1963	173,158 [r]	650	172,508 [r]
1964	182,173	726	181,447
1965	182,046	710	181,336
1966	194,725	723	194,002
1967	195,541	669	194,872
1968	204,559	730	203,829

[a] Disability causing absence from work for a full day or shift beyond the day of the injury. Excludes injuries to employees not covered by the California Workmen's Compensation Act, such as maritime workers, Federal employees, and railroad workers in interstate commerce.

[b] The work fatality totals for years since 1963 are not comparable with those for earlier years due to a change in the definition of a "work fatality".

[r] Revised.

MANPOWER DEVELOPMENT AND TRAINING ACTIVITIES,[a] 1965–68

Activity	1965	1966	1967	1968
Number of trainees:				
Offered training	18,363	27,814	34,115	33,721
Initially enrolled	17,096	26,380	32,436	32,093
Transferred from initial enrollment in CEP[b] to other training	--	--	211	907
Completed occupational training[c]	10,331	18,191	r18,971	p15,652
Contacted following occupational training	8,418	14,347	r14,160	p10,494
Employed in training related jobs	5,800	11,085	r10,814	p7,674
Employed in nontraining related jobs	1,017	1,221	r1,013	p865
Completed CEP[b] orientation training	--	--	437	2,453
Determined entitled to training allowances[d]	14,429	15,431	17,713	21,938
Weeks of training compensated	179,101	294,221	269,156	339,490
Amount of training payments	$8,792,713	$15,535,589	$15,170,401	$17,580,060

[a] First institutional training course approved on August 27, 1962. First on-the-job training course approved August 21, 1963.
[b] A brief orientation and attitudinal program.
[c] Number of trainees in completed classes for which at least one followup has been made.
[d] Cannot be directly compared to number of enrollments during month because of lag in computation and payment of allowances.
[p] Preliminary.
[r] Revised.

TABLE C-24

APPRENTICES IN SELECTED TRADES[a] ACTIVE AT END OF YEAR AND COMPLETING IN YEAR, CALIFORNIA, 1968

Trade	Number of apprentices	
	Active on December 31, 1968	Completed in 1968
Total	19,661	3,751
Auto body and fender repairman	382	56
Automotive mechanic	1,239	181
Barber	203	53
Bricklayer	199	30
Carpenter	3,804	569
Carpet, linoleum and soft tile mechanic	247	58
Cement mason	221	60
Compositor	241	36
Electrician	1,574	484
Electronics technician	147	42
Glazier	160	57
Ironworker (construction)	1,009	147
Lather	220	19
Lineman	109	38
Machinist, general	1,632	117
Meat cutter	1,000	361
Mill and cabinetmaker	279	52
Millwright	143	34
Molder (core maker)	120	19
Operating engineer		
Grading and paving equipment operator	407	17
Heavy duty repairman	381	22
Universal equipment operator	203	6
Office machine mechanic	168	2
Painter	640	167
Partsman, auto	105	17
Pipe and sprinkler fitter	302	30
Plasterer	165	36
Plumber	1,244	482
Refrigeration and air conditioning mechanic	257	29
Roofer	296	44
Sheet metal worker	1,305	307
Steamfitter	306	50
Surveyor (chief of party)	258	49
Tool and die maker	549	39
Truck mechanic	146	41

[a] The 35 trades listed are all those with 100 or more active registered apprentices as of December 31, 1968. They accounted for 88.7 percent of the total of 22,164 apprentices active on that date

SECTION D.

INCOME AND COST-OF-LIVING

This section presents data on business and personal income and the consumer price index.

Business Income

Tables D-1 to D-3 are compiled from corporate income data reported on returns filed with the Franchise Tax Board.

Corporations doing business in California and those having income from California sources but not technically doing business here are subject to the Bank and Corporation Tax Law. Chapter 2 of the law imposes the bank and corporation franchise tax and Chapter 3 the corporation income tax.

The bank and corporation franchise tax is imposed for the privilege of doing business in California and is according to or measured by the amount of net income earned in or allocable to the State in the preceding fiscal or calendar year. A corporation conducting a unitary business both within and without the State applies an allocation factor to its income in order to determine the amount subject to state taxation. The standard allocation formula is the arithmetic average of three factors—the ratio of California sales to total sales, the ratio of California payrolls to total payrolls, and the ratio of California property to total property. For the period 1935-1958, the basic bank and corporation franchise tax rate was 4 percent and the minimum franchise tax $25 a year. From 1959 to 1966, the rate was set at 5½ percent and the minimum tax, with limited exceptions, was increased to $100. For 1967 the basic rate was increased to 7 percent. Banks are exempt from paying the minimum tax.

The corporation income tax applies to corporations that derive income from California sources but do not engage in intrastate business in California. The corporation income tax rate is also 7 percent (5½ percent for 1959–66 and 4 percent for 1958 and earlier income years) but there is no minimum tax. Data for these corporations have been omitted from Tables D-1 to D-3. For 1967, they numbered only 1,633, reported $27,207,139 net income taxable in California, aud paid $2,331,720 in corporation income taxes.

Returns for fiscal years ending within a caleudar year are included with returns for that calendar year.

Personal Income

Estimates of personal income received by residents of each state are prepared annually by the National Income Division, Office of Business Economics, in the United States Department of Commerce. Data are available, by years and types of income, back to 1929 in *Personal Income By States.* Totals and details for the most recent years are reported in the August issue of the *Survey of Current Business.* Quarterly estimates of personal income in California, at annual rates, comparable to the United States Department of Commerce series, are prepared by the Budget Division of the State Department of Finance. Mimeographed reports of this information are available upon request.

An understanding of the conceptual basis of income estimates is essential to the use of these data and it is hoped that users interested in sources of basic information, estimating techniques, definitions, and limitations of these data will consult the Department of Commerce reports mentioned above. Particular note should be taken of the facts that income (1) represents receipts before payment of income taxes and certain non-tax charges, and (2) includes nonmonetary income, such as imputed net rental values of owner-occupied homes and payments in kind as well as in cash. As defined, residents include individuals, nonprofit institutions, private trusts, and private pension, health and welfare funds. Nonprofit institutions include religious organizations, clubs, labor organizations, nonprofit schools and hospitals, charitable, welfare, and other private nonprofit agencies furnishing services to individuals.

Briefly stated, the following are encompassed in the six categories of income shown here:

Wage and salary disbursements. Monetary remuneration of employees, including commissions, tips, bouuses, etc., and payments in kind.

Other labor income. Employer contributions under private pension, health, welfare and group insurauce plans, compensation for injuries, pay of military reservists, directors' fees, etc.

Proprietors' income. Net business earnings of owners of unincorporated enterprises, including farmers and such professional practitioners as doctors, dentists, and lawyers.

Property income. Rental income of persons (including royalties on patents, copyrights, and rights to natural resources and imputed net rents), personal interest incomes (including certain imputations), and cash dividends.

Transfer payments. Receipts from government aud business for which no service is rendered currently: pensions, unemployment benefits, disability benefits, medicare benefits, direct relief, bad debts absorbed by business establishmeuts, corporate gifts to private nonprofit institutions, etc.

Personal contributions for social insurance. Employee contributions for old age and survivors insurance, unemployment insurance, medicare and public employee retirement systems. Includes similar contributions for such purposes by self-employed individuals. Personal contributions for social insurance are deducted in estimating personal income, since wage and salary disbursements are reported including amounts withheld by employers for this purpose.

The source report shows total and per capita incomes by types and major sources in greater detail

than is shown in this *Abstract,* industrial sources of personal income, total and per capita disposable income (after direct personal taxes and certain nontax payments) and ratios which cannot be reproduced here for reasons of space.

Personal income tax data. Personal income tax returns are required of single persons with gross incomes of $6,000 or more or adjusted gross incomes of $2,750 or more and of married persons with gross incomes of $6,000 or more or adjusted gross incomes of $5,500 or more. From 1964–66, the filing requirement was $5,000 of gross income or $2,000 of adjusted gross income for single persons and $5,000 of gross income or $4,000 of adjusted gross income for married persons. For the period 1959–63, the filing requirement was based on net income of $1,500 for single persons and unmarried heads of households and $3,000 for married persons. Prior to 1959, the net income amounts were $2,000 for single persons and unmarried heads of households and $3,500 for married persons.

Personal income tax tables are classified by adjusted gross income class intervals. Adjusted gross income includes salaries and wages (less certain unreimbursed expenses incurred in connection with employment), dividends, interest, annuities, a percentage of net gains or net losses from the sale or exchange of capital assets, gains or losses from the sale or exchange of property other than capital assets, rents and royalties less expenses attributable thereto, gross receipts from business less costs of goods sold and business expenses, and distributive shares of partnership gross income, alimony and separate maintenance payments, pensions, income from life insurance and endowment contracts, income from discharge of indebtedness, income in respect to a decedent, and income from interest in an estate or trust.

Sampling techniques have been used to derive most of the data appearing in the tables presenting the number of personal income tax returns and the amount of adjusted gross income.

It is evident, of course, that much of the personal income is received by persons who had insufficient amounts of gross income and net income to necessitate their filing state returns or is exempt from state taxation (e.g., dividends on veterans' government insurance, federal and state social security benefits, railroad retirement benefits, workmen's compensation for personal injuries or sickness, interest on federal bonds, etc.). Conversely, there are items of taxable income which are not included in the personal income concept such as gains from sales of assets and alimony. Hence, the data on taxable income are not strictly comparable to those on personal income.

Prices

Tables D-12 and D-13 present the Consumer Price Index for the Los Angeles-Long Beach Metropolitan Area (Los Angeles and Orange counties), the San Francisco-Oakland Metropolitan Area (Alameda, Contra Costa, Marin, San Francisco, San Mateo and Solano counties), San Diego, California, and the United States.

The index measures the average change in prices of goods and services usually bought by urban wage earners and clerical workers, both families and single persons living alone.

The indices for Los Angeles-Long Beach, San Francisco-Oakland and the United States are those compiled by the United States Bureau of Labor Statistics. The index for California has been computed by the California Department of Industrial Relations, Division of Labor Statistics and Research, as the weighted average of the Los Angeles and San Francisco indices. The weights used are proportional to the populations of the Los Angeles and San Francisco areas.

Current figures for Pacific Coast areas are published regularly by the Regional Office, United States Bureau of Labor Statistics, San Francisco.

Comparisons of indices for individual areas show only that prices in one location changed more or less than in another. These indices cannot be used to measure differences in price levels or in living costs between areas.

TABLE D-1

CORPORATE TAX RETURNS, STATE NET INCOME, AND TAX ASSESSED, CALIFORNIA, 1950–67 [a]

Income year	Number of returns	Net income reported for state taxation	Tax assessed [b]
1950	21,987	$2,431,894,545	$105,117,408
1955	35,020	3,429,694,824	151,508,790
1960	56,987	4,181,754,205	255,234,712
1961	59,746	4,508,953,067	275,392,583
1962	63,400	4,754,427,317	287,066,421
1963	66,496	5,091,922,000	304,613,490
1964	69,555	5,525,955,803	326,880,193
1965	71,484	6,007,206,947	352,892,460
1966	73,076	6,637,754,510	385,212,963
1967	73,433	6,455,635,105	456,606,107

[a] Includes bank and corporation franchise tax returns received through November of the succeeding year. Returns for a given income year include those for the calendar year and fiscal years ended therein (i.e. 1966 includes January 31, 1966 through December 31, 1966 accounting periods). Excludes corporation income tax returns.

[b] Includes the basic bank and corporation franchise tax (4% of net income, 1950–58; 5½%, 1959–66; 7%, 1967) and the bank and financial tax (maximum of 4% of net income) imposed under the provisions of Section 23186A of the Bank and Corporation Tax Law.

[a] Includes bank and corporation franchise tax returns received through November of the succeeding year. Returns for a given income year include those for the calendar year and fiscal years ended therein (i.e. 1966 includes January 31, 1966 through December 31, 1966 accounting periods). Excludes corporation income tax returns.

[b] As allocated to state for tax purposes.

Franchise Tax Board
Research and Statistics Section

[c] Includes ordnance and accessories, tobacco manufactures, and other manufactures not listed elsewhere.

[d] Includes building and loan associations, savings and loan associations, and financial corporations not elsewhere classified. (Insurance companies are not subject to franchise taxes.)

[e] Includes highway, railroad, car and express, water, and airline utilities.

[f] Includes water, wharfage, carloading, stevedoring, warehousing, cold storage, and pipeline companies.

[a] Data for the 18 smallest counties have been grouped to avoid excessive sampling errors. These counties are grouped as follows: *North Sierra Area* includes Lassen, Modoc, Nevada, Plumas, and Sierra Counties; *South Sierra Area* includes Alpine, Amador, Calaveras, Inyo, Mariposa, Mono, and Tuolumne Counties; *North Coast Area* includes Del Norte, Lake, and Trinity Counties; *Valley and Coastal Area* includes Colusa, Glenn, and San Benito Counties.

[b] Data are not strictly comparable to prior years due to changes in filing requirements for the 1967 income year.

SECTION E.

HEALTH AND WELFARE

Compiled under this broad heading are tables relating to vital statistics and other public health; mental hygiene; crime, criminal justice and delinquency; and social insurance.

Vital Statistics and Other Public Health

This section presents selected statistics relating to public health in California, prepared by the State Department of Public Health.

The sources of data for public health statistics and reports are registration and reporting systems established by law, voluntary reporting systems established with local health agencies, and surveys and special studies conducted or sponsored by the Department.

Tables E-1–E-4 and E-7: Data on births, deaths, marriages, divorces and annulments. In interpreting these statistics, certain limitations must be recognized. Crude rates for vital events are influenced by age and sex distributions within the population. Also, the comparability of cause of death data is affected by increasing medical knowledge, changes in classifying disease categories, and changes in international rules for selecting the underlying cause of death.

For interpretation of statistics relating to vital events, the following definitions should be noted:

Residence. A person's residence is his usual place of abode. Birth tables by residence refer to the place where the child's mother usually lives. Deaths in institutions were allocated to the inmate's previous residence regardless of length of stay in institution prior to 1968. Death tables by residence refer to the place where the decedent lived unless the decedent had lived in the place of occurrence more than a year (except if place of occurrence were a mental or penal institution).

Occurrence. The place of occurrence is where the event actually occurred. California residents taking part in marriages, divorces and annulments in other states are not enumerated in Table E-3.

Live Birth. Live Birth is the complete expulsion or extraction from its mother of a product of conception (irrespective of the duration of pregnancy) which, after such separation, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. A fetal death is required to be registered if the 20th week of gestation has been reached.

Table E-9: Data on selected notifiable diseases. Notification to the local health authority that a case of communicable disease exists within the particular jurisdiction is the first step towards control. These morbidity data are limited by the incompleteness of reporting, the changes made in specific diseases which shall be reported, and by the nature of the incidence of certain diseases in cyclical patterns.

Tables E-5 and E-6: Licensed facilities and beds. The Department of Public Health licenses hospitals, nursing homes and related health facilities to insure that standards of patient care are met. The Hospital Advisory Board conducts public hearings and makes recommendations on standards.

More detailed statistical information is published annually in the California Public Health Statistical Report and other series. These and other public health data from program activities, special studies and research projects are available from the Office of Special Services, Health Intelligence Unit, Department of Pubilc Health, 2151 Berkeley Way, Berkeley, California.

Crime, Criminal Justice and Delinquency

This section presents summary tables showing the number and procedural movement of persons under commitment to the two State correctional agencies, the Departments of Corrections and Youth Authority.

Data relating to the Department of Corrections were compiled starting with 1945, and those for the Youth Authority with 1946, the years in which central statistical controls were established. Figures for years not included here were published in the 1964 *California Statistical Abstract.*

No data are presented on crimes committed, persons arrested, or the procedures of criminal justice. These data, to be meaningful, must be given in more detail, and require more explanation and qualification than would be appropriate in this volume. The interested reader is referred to the publications of the Bureau of Criminal Statistics, Department of Justice, for such data. *Crime and Delinquency in California* presents data on felony crimes, felony arrests, and juvenile arrests, as reported by sheriffs and police, and on the procedures and results of prosecution in the superior courts, as reported by district attorneys. The Justice publication also presents data on the characteristics of, and procedures applied to (1) juveniles referred to county probation departments, (2) persons referred by superior and juvenile courts to the Youth Authority and, (3) convicted persons referred by superior courts to their respective probation officers. *California Prisoners*, published by California Department of Corrections, deseribes the characteristics and movement through prison and parole of adult persons convicted of felonies and committed to the Department of Corrections.

In the Department of Corrections, the California Rehabilitation Center was established by 1961 legislative action. This Center, opened September 15, 1961, is for the confinement and treatment of nareotic addicts civilly committed to the Department under Penal Code Chapter 11 and Welfare and Institutions

Code 3000 et seq. The Department of Corrections has a new publication, *Summary Statistics, Civil Commitment Program for Narcotic Addicts,* which presents data on this program.

The Annual *Statistical Report* published by the California Youth Authority summarizes the facts about the referrals to that Department, characteristics of wards first committed, ward population movement and data on parole performance.

Social Insurance and Welfare

This section presents data relating to State programs providing unemployment and disability insurance, Federal programs administered in California to provide unemployment compensation to veterans and former federal employees and Old-Age, Survivors, and Disability Insurance benefits; federal, state and county programs assisting the aged, the blind, the disabled, and needy children, providing medical care for public assistance recipients and medical assistance for the needy; county programs of general relief; and the state, county and private agency program providing adoption services.

There are several principal sources for these data. Current statistics relative to operations are available in the monthly report to the Governor prepared by the Department of Employment and in monthly reports prepared by the Department of Social Welfare. Data on public assistance expenditures and recipients are regularly published in *Public Welfare in California,* issued monthly by the Department of Social Welfare. Public assistance data are based on reports to the Department of Social Welfare by county welfare departments. Data on medical care recipients and expenditures were published monthly through February 1966 by the Department of Social Welfare in *Public Assistance Medical Care and Medical Assistance for the Aged, Services and Expenditure Report.* With the inception of the California Medical Assistance Program beginning March 1, 1966, medical care reporting has been assumed by the Department of Health Care Services. The data are presently published quarterly in *California Medical Assistance Program, Services and Expenditures Report.* Public assistance data are based on reports to the Department of Social Welfare by county welfare departments. Data for California Medical Assistance Program are based on claims paid by the fiscal intermediaries and data received from the State Department of Mental Hygiene. Data on adoption services are based on reports to the Department of Social Welfare by the Department's field staff, and by county welfare departments and private adoption agencies.

Employment Security. Unemployment insurance and disability insurance activities are reported here from 1950 on. Legislation has modified the coverage, benefits, and services under these programs from time to time, and many uses of the data will require reference to the statutory changes. A detailed description of all changes which substantially affect the figures given here has been published by the Department of Employment under the title, *Summary of Major Changes in Program of Department of Employment, 1935–1968.*

Old Age Security. Statistics under this caption relate to financial assistance to persons 65 years of age or over who do not have sufficient financial resources to support themselves. Within limitations, recipients may own real property if it provides some income and keep additional real or personal property as a reserve for future needs. In general, the ceiling on income producing real property is $5,000 assessed valuation and $1,200 net value on real and personal property held as a reserve. There is no limitation on the value of any real or personal property used as a home. The recipient must be a resident of California.

Aid to the Blind. The data relate to financial assistance for blind persons in need who cannot support themselves.

Recipients may own real property if it provides some income and keep additional real or personal property as a reserve for future needs. In general, income-producing property must be producing income reasonably related to its value and the ceiling on real and personal property held as a reserve is $1,500 net value. There is no limitation on the value of any real or personal property used as a home. A recipient with an approved plan for self-support may own additional property for not longer than 36 months if the property will further his self-support plan. The recipient must be at least 16 years of age and be a resident of California.

Aid to Potentially Self-supporting Blind. These figures describe financial assistance and medical care for persons who, because of blindness, are unable to support themselves, but are working on a plan for self-support.

Within limitations, recipients may own real property and keep additional real or personal property for future needs and own additional property if the property will further his self-support plan. Age and residence requirements are the same as those for Aid to the Blind.

Aid to Families with Dependent Children. The data relate to financial assistance for children under 21 years of age who are in need because of the death, continuous absence, incapacity, or unemployment of a parent. (The program was amended, effective February 1, 1964, to include children in need because of unemployment of a parent.) In general, the ceilings in financial resources are $600 value of personal property, less certain encumbrances, and $5,000 assessed valuation of real property, less encumbrances of record. The recipient must be a resident of California. Assistance is available for children living in foster homes as well as for children living with a parent(s) or relatives.

Aid to Needy Disabled. Figures under this heading relate to financial assistance and medical care for needy persons who have a major physical or mental impairment or a combination of both that is likely to continue without substantial improvement throughout their lifetime and which substantially precludes them from engaging in useful occupations within their competence, such as holding a job or homemaking. To be eligible, a person must be at least 18 years of age and be a resident of California. Property qualifications are the same as in Old Age Security.

General Relief. Data on this subject relate to assistance to needy persons not eligible under state subvented assistance programs listed above. It is administered and financed entirely by counties. Eligibility requirements and standards of assistance vary from county to county.

Adoptions. Services provided by this program include studies of the suitability of adoptive homes, suitability of children for adoption, and recommendations to the courts on granting of adoption petitions. When a child is placed in an adoptive home by an adoption agency (county or private), it is termed a "relinquishment" adoption; when the child is placed directly by the parent, it is termed an "independent" adoption.

Public Assistance Medical Care (PAMC). This program, which began October 1957, provided payments for medical care, (chiefly outpatient care), for recipients of categorical aid. The scope of benefits varied according to the category of aid. PAMC data are shown as part of the statistics for each categorical aid program. The PAMC program was also terminated with the advent of the California Medical Assistance Program on March 1, 1966.

Medical Assistance for the Aged. This program, which began January 1, 1962, provided payments for care in hospitals and nursing homes and outpatient after-care, to persons 65 years of age and over who are not recipients of Old Age Security and who are unable to pay for this care from their own funds. The data show the number of inpatient and outpatient certificate holders in benefit status, total and average payments by type of care, and source of funds. The MAA program was abolished when the California Medical Assistance Program became effective March 1, 1966. Persons receiving medical care under MAA were transferred to the new program.

California Medical Assistance Program. On March 1, 1966, California's new Medical Assistance Program replaced Public Assistance Medical Care and Medical Assistance for the Aged. Under the new program, uniform comprehensive medical coverage is available to all aid recipients. In addition, inpatient care and outpatient after-care are available to those medically needy persons and families who meet categorical aid requirements, except for income.

Mental Hygiene

This section presents statistics on the major programs carried on by the State of California for the care and treatment of persons with mental and emotional disorders, including mental retardation. As of June 30, the State Department of Mental Hygiene maintained ten hospitals for the mentally ill (four of which also have special units for care and training of mental retardates), four hospitals for the mentally retarded, nine hospital-based aftercare facilities, and two neuropsychiatric institutes (associated with the University of California Medical School) for treatment of patients, training of professional personnel, and research. The state also operated six community-based outpatient clinics and three day treatment centers during the 1967–68 fiscal year. All but one of these facilities were closed on June 30, 1968; the last, an outpatient clinic specializing in training in child psychiatry, was closed in December, 1968.

It should be understood that the prevalence of treated mental disorder cannot be measured by the statistics in the following tables, since these data are limited to facilities either operated by or subsidized through the Department. Treatment is also offered by licensed private mental institutions, by locally-operated nonprofit outpatient psychiatric clinics, by general hospitals with psychiatric wards, by hospitals of the United States Veterans Administration, by public school systems with special classes (particularly for children with mild or moderate mental retardation), and by the large number of psychiatrists in private practice throughout the state.

More detailed information on the subjects covered by the following tables and other services in the field of mental hygiene is available in periodic and special reports issued by the Department of Mental Hygiene. Additional statistical data on mental hygiene facilities outside the Department are available in periodic reports issued by the Biometrics Branch of the National Institute of Mental Health.

Hospitals for mentally ill. The majority of patients now enter these hospitals voluntarily. This is a change from earlier years when the majority of admissions were on an involuntary basis. Involuntary admissions are made up primarily of patients under civil commitment for mental illness or for alcoholism, while smaller numbers are under commitment for drug addiction, sex offenses predisposed by mental disorder and other judicial and non-judicial classifications.

Time limits on the length of hospitalization are set by statute for some classifications, while other classifications are indeterminate. Under most circumstances a patient may be released whenever, in the medical judgment of the superintendent, he has improved sufficiently to permit return to the community. For some classes of patients, the release may result in a return to the Military Department, the California Youth Authority or the Superior Court. Voluntary patients may leave the hospital seven days after submitting written notice unless a petition has been filed for commitment of the person as mentally ill. Patients under commitment, of course, can petition the committing court for their release through habeas corpus proceedings. Hospitalization ranges from a few days for the treatment of an acute transitory episode to several years for a patient with severe chronic mental illness. The median length of stay prior to discharge is about two months.

Some patients are placed in the state hospital for observation prior to the adjudication of mental illness. With the increasing use that is being made of local psychiatric facilities for these purposes and the rise in the number of voluntary entries to the state hospital, the proportion of observation placements is declining.

Patients may be released from the hospital by leave of absence, with continued extramural supervision by the hospitals' Convalescent Leave psychiatrists and personnel in the Community Services Division of the Department of Social Welfare. While many leave

placements result in the patients' return to the hospital, the majority are successfully closed by discharge. Departures without staff permission by patients under commitment are classified as unauthorized absences. In most instances the patient returns to the hospital; however, the case may be continued under extramural supervision or closed by discharge.

For many patients the case is closed by direct discharge at the time the patient is released from the hospital. Finally, cases are also closed by death in the hospital.

Hospitals for the mentally retarded. A patient is considered eligible for admission only if the parent or guardian, the county authorities, and the hospital medical staff are in complete agreement that hospitalization is best for the patient and for his family. Following the determination of eligibility, admission may be delayed for periods ranging from a few days to several years, depending upon the relative urgency of the case. On June 30, 1968, there were 331 cases on the hospitals' waiting list.

Unlike mental illness, mental retardation is relatively incurable. Thus patients with severe mental retardation usually receive lifetime custodial care. On the other hand, the mildly mentally retarded participate in training programs and in hospital maintenance activities, and often are able to return to useful lives in the community after only a few years.

Community mental health services. By 1968, forty-one of California's fifty-eight counties had established mental health programs under the Short-Doyle Act, originally enacted in 1957. This Act enables cities and counties to provide timely mental health care in the local community with a minimum of disruption of the day-to-day life of the patient. The law authorizes State reimbursement from 50 to 75 percent of the cost of care for the provision of inpatient services, outpatient services, and rehabilitation services (the direct services) and information-education and cousultation (the indirect services). Although a community is required to provide only two of the five types of service in order to qualify for reimbursement, many provide three or more. During the fiscal year 1967–68 there were more than 8,000 entries to rehabilitation services, 42,000 entries to inpatient services, and almost 94,000 entries to outpatient services. The rapid growth of Short-Doyle services is evidenced by the fact that each of those totals is at least four times the number for 1962–63.

Bureau of Licensing and Certification

TABLE E-7

TEN PRINCIPAL CAUSES OF DEATH, CALIFORNIA, 1968 [a]

Cause of death	Seventh revision international list number	Number	Rate [b]	Percent [c]
All causes		160,636	812.0	100.0
Diseases of the heart	410–443	58,633	296.4	36.5
Malignant neoplasms	140–205	29,023	146.7	18.1
Vascular lesions affecting the central nervous system	330–334	17,645	89.2	11.0
Accidents	800–962	10,981	55.5	6.8
Influenza and pneumonia except of newborn	480–493	4,684	23.7	2.9
Cirrhosis of the liver	581	4,159	21.0	2.6
Respiratory diseases commonly designated as obstructive	241, 501, 502, 525, 526, 527.1	4,064	20.5	2.5
Certain diseases of early infancy	760–776	3,916	11.5	2.4
Suicide	963, 970–979	3,427	17.3	2.1
Other diseases of the circulatory system	451–468	2,892	14.6	1.8
All other causes	Residual	21,212	10.7	13.2

[a] By place of residence.
[b] Rates are per 100,000 estimated population, except certain diseases of early infancy which is per 1,000 live births. California July 1 estimated population for 1968 was 19,782,000.
[c] Percents are rounded independently and may not add to totals.

Tetanus	18	8
Trachoma	2	--
Trichinosis	5	--
Tuberculosis	3,846	439
Tularemia	3	--
Typhoid fever	54	1
Veneral diseases	86,544	229
Chancroid	70	--
Gonorrhea	75,998	--
Granuloma Inguinale	6	--
Lymphogranuloma Venereum	34	1
Syphilis, total	10,436	228
Primary and secondary	1,749	--

[a] Deaths shown above may not agree with deaths shown in vital statistics tables because some diseases are not listed separately in the International List of Causes of Death upon which the vital statistics tables are based or the definitions of some diseases used in the International List differ from the definitions used for morbidity purposes.
[b] Nine cases were Mexicans brought to California for treatment only; an additional case acquired illness in Mexico.
[c] All polio deaths were due to the late effects of poliomyelitis contracted prior to 1968.
[p] Preliminary.

Department of Public Health
Bureau of Communicable Diseases

[a] General Home Relief is that form of General Relief given to persons in their home to meet one or more of the basic subsistence items of food, shelter, or clothing. The definition of GHR includes residents who are residing in the county. It does *not* include transients since they are by definition persons who are not residing in the county.

[b] Usual low month.

[c] Usual high month.

[a] Medical care costs shown represent expenditures made under the Public Assistance Medical Care program which was in effect for Aid to the Disabled program for the period October 1959 through February 1966. This program was superseded by the California Medical Assistance Program. Costs under the California Medical Assistance Program are shown in a separate table.

[b] Program effective October 1, 1957.

[c] Based on recipients eligible for Public Assistance Medical Care.

[d] Medical care costs shown are for July 1965 through February 1966.

[a] Includes AFDC—Family Group component and after February 1, 1964 the Unemployed component.
[b] Includes supplemental aid from county funds.
[c] Medical care costs shown represent expenditures made under the Public Assistance Medical Care Program which was in effect from October 1957 through February 1966. This program was superseded by the California Medical Assistance Program. Costs under the California Medical Assistance Program are shown in a separate table.
[d] Based on recipients eligible for Public Assistance Medical Care.
[e] Medical care costs shown are for July 1965 through February 1966.

[a] Includes supplemental aid from county funds.
[b] Medical care costs shown represent expenditures made under the Public Assistance Medical Care program which was in effect from October 1957 through February 1966. This program was superseded by the California Medical Assistance Program. Costs under the California Medical Assistance Program are shown in a separate table.
[c] Federal participation effective April 1, 1963.
[d] Based on recipients eligible for Public Assistance Medical Care.
[e] Medical care costs shown are for July 1965 through February 1966.

Persons or families whose monthly income is in excess of the basic maintenance base, but is not sufficient to provide for the cost of health care, and who otherwise meet eligibility requirements for one of the categorical assistance programs. Also included are persons or families who are defined as Public Assistance recipients but do not receive a cash grant because of one of the following reasons: eligible for public assistance grant but not wishing to receive one; under 21 in AFDC families for whom cash aid is not given currently because of age; children living in foster care homes or institutions whose needs are met in whole or part by public funds.

[a] Benefit payments being made at a given time with no deductions or with deductions amounting to less than a month's benefit. Not precisely equivalent to number of beneficiaries because prior to 1956, some persons received more than one check.

[b] Includes old-age, wife's or husband's, widow's or widower's and parent's benefits.

[c] Data as of February 1959; December 1958 data not published because of heavy workload due to legislative changes.

SECTION F.

EDUCATION

This section presents data complied by the Bureau of Administrative Research and District Organization of the California State Department of Education relative to public school enrollment, apportionment, certificated personnel, and current expenditures for public school education. Higher education data relate to all public and independent colleges.

Actual enrollment. This term describes the number of pupils registered at a specific period during the school year. Enrollment information is collected once in the fall and again in the spring. The data given here are enrollments as of the fourth week of the fall semester. The K-14 enrollment indicates kindergarten through grade fourteen; K-8, kindergarten through grade eight; high school enrollment includes grades nine through twelve; and junior college, grades thirteen and fourteen. Special enrollment, or enrollment in special classes, is defined by footnotes.

Detailed information on actual enrollments by individual grades by county, on each classification included in the special enrollments and on the number of pupils on double sessions, is published annually by the State Department of Education.

Enrollments in higher education, by year and by individual institutions, are published by the Department of Finance, Budget Division.

Apportionment average daily attendance. This represents the average daily attendance used to apportion state school funds. For this purpose, the elementary average daily attendance includes kindergarten through grade eight, irrespective of the location of the grades. Accordingly, grades seven and eight in the junior high schools are included in the elementary level. The high school average daily atttendance includes grades nine through twelve, irrespective of location, and the junior college, grades thirteen and fourteen.

Apportionment of state funds to public schools. These figures indicate the principal apportionment which includes both basic and equalization financial aid to each of the levels (elementary, high school, and junior college). The apportionment which is made to the county school service fund, i.e., the operation of the office of the County Superintendent of Schools also is included. Since the state apportionment to schools is now made on current data, average daily attendance and assessed valuation, the apportionment for growth has been eliminated. Special apportionments include reimbursements for transportation, driver education, and excess cost for the education of handicapped pupils.

Current expenditures. The figures given here include total expenditures made by the school districts from (1) local funds, raised chiefly through property taxes, (2) the moneys apportioned to the districts by the State and, (3) Federal funds. These expenditures include only expenditures from the general fund of the school district, but do not include general fund expenditures for food services, community services and capital outlay. Special funds, such as building fund, bond interest and redemption, etc., are not included. Expenditures are presented in terms of district organization, i.e., the expenditures of the elementary districts, high school districts, junior college districts, and unified districts. The unified district column indicates the total expenditures for unified districts, including all levels which are encompassed by unified districts. In some instances this is kindergarten through grade twelve, and in other instances, kindergarten through fourteen. All of the expenditures of the unified districts are included in this column and are not indicated in the other column designations.

Full-time certificated personnel. This figure is the total number of full-time certificated personnel in the public schools, exclusive of substitute or other part-time teachers. The number of full-time certificated personnel in California public schools is available in "Salaries of Certificated Employees in California Public Schools," published annually by the Bureau of Administrative Research and District Organization.

SECTION G.

RESOURCE INDUSTRIES

This section presents data relating to five of the basic resources of California: water, agriculture, forestry, fishing, and mining. The descriptive section below includes a brief summary of the series covered and sources for additional information.

Water

Tables G-1 to G-17 present summary information describing the uses to which land is put in California, the land area receiving water service, and the distribution of the available water supply of the State. Whenever possible, the information is given by hydrologic study areas, which have been outlined in the plate on page 102.

The following is a general statement describing water conditions throughout the State during the 1967–68 water year, adapted from the introduction to the Department of Water Resources' Bulletin No. 120-68, Water Conditions in California—Fall Report, October 1968.

Water Conditions in California, 1967–68. Dry conditions existed over most of the State during the 1967–68 water year. Spring and summer snowmelt runoff from Central Valley streams was the lowest since 1961 and ranks with the five lowest of the past 30 years. There was a general lack of late winter precipitation in all major water producing areas. By May 1 the snowpack water content ranged from a low of only 30 percent of average in San Joaquin Valley watersheds to a high of 55 percent of average in the North Coastal area. This light snowpack was depleted rapidly and it soon became apparent that early season forecasts for below normal runoff would be verified. By July 1, many of the smaller streams were completely dry or had reached minimum base flow. Heavier use of ground water supplies throughout the State resulted in a general lowering of levels from those reported last year at this time. Still, the impact of this dry year was tempered by the record carryover storage and relatively high ground water levels of one year ago, and there were no critical shortages in areas normally dependent upon stored supplies.

Water year precipitation was below normal in all hydrographic areas of the State, averaging about 75 percent of normal. The South Coastal area did experience an exceedingly wet November (220 percent of normal) and gave expectations for a third consecutive above normal water year. The statewide dry regime soon dispelled this. January storms produced monthly precipitation totals of about 150 percent of normal in North Coastal and Sacramento Valley watersheds. This was the only winter month during which significantly above normal precipitation occurred in any of the major water producing basins of Northern California. Widespread showers and thunderstorms during August also produced impressive monthly totals of from one to five inches of rainfall at many North Coastal and Northern Sierra stations. The above were the only noteworthy exceptions to the subnormal precipitation pattern of the past year.

Total runoff in the major hydrographic areas of California was about 75 percent of normal, ranging from less than 20 percent of normal in the Central Coastal area to 80 percent of normal in the North Coastal, the Sacramento Valley, and the Lahontan areas. Runoff in both the San Francisco Bay and South Coastal areas was about 50 percent of normal and was only slightly greater with respect to normal (55 percent) in the San Joaquin Valley. Monthly flows in coastal streams south of San Francisco Bay have been below normal each month since December while several major San Joaquin Valley streams have experienced below normal flows every month of the past year; thus, 1968 was the driest water year since 1961 in these areas.

April–July runoff of snowfed streams in the Sacramento and San Joaquin Valleys was about 60 percent of normal and 50 percent of normal, respectively. Runoff for this period in the American River Basin was 45 percent of average, the third lowest of the past 30 years. April–July runoff with respect to normal on other major streams in the Central Valley ranged from 37 percent for the Tule River Basin (sixth lowest of record) to about 75 percent for the Upper Sacramento River Basin (the ninth lowest of record).

At the end of the water year, the storage in 120 of California's major reservoirs was about 13,500,000 acre-feet or 50 percent of the aggregate capacity. While this is three million acre-feet less than the record storage of one year ago, it is still slightly greater than average carryover storage for the last ten years. October 1 contents in 59 major Central Valley reservoirs was 10,539,000 acre-feet, or 95 percent of average and over 50 percent of their aggregate capacity. This is 2,013,000 acre-feet less than these reservoirs held one year ago. Nearly 1,680,000 acre-feet of Feather River water was impounded by Oroville Dam at the end of its first operational water year.

Publications. Much information on water resources and utilization is available in the several publications of the Department of Water Resources quoted as sources for most of the tables included in this section. In addition, a large amount of specific information is included in reports of other general and special investigations by the Department. A price list of publications in print is available upon request to the Department of Water Resources.

Agriculture

Data presented in this section, with the exception of the United States Census data, are official estimates of the United States and California Departments of Agriculture. Current estimates are available in greater detail in reports issued by the Bureau of Agricultural Statistics, which also contain more detailed statistics. Data for many agricultural commodities are available for varying numbers of years preceding those shown in the tables. Data for 1968 are preliminary estimates.

Minor crops for which estimates are not prepared are not included in the "all field crops," "all fruit and nut crops," "all bushberry crops" and "all vegetable crops" categories in the tables. Certain information for some items does not appear in the tables because estimates are not applicable or were not made for the specific crop. For example, cottonseed is harvested from the same acreage as cotton lint, therefore acreage estimates are not published for cottonseed. Another example is corn for forage, for which separate production and value data are not estimated.

Years designated. The years designated for crops are "crop years", not calendar years. Planting or blooming may have started in the preceding year and marketing may have extended into the following year. Price and value data for livestock and poultry products pertain to marketings in the year specified. Production data for livestock and poultry products are for calendar years.

Prices. Estimates of prices received by farmers generally represent composite averages of all grades, classes and methods of sale for the State as a whole. Prices of vegetables for fresh market represent the average paid for the packed products loaded at f.o.b. position. Prices of fruits and nuts are on the basis of naked fruit at growers' first delivery point.

Production of no value. Occasionally a portion of the production of a crop has no value. When this occurs, that portion without value is excluded from computations of average unit value and total value.

Forestry

Forestry is one of the most important enterprises in California and represents a significant proportion of such activities in the Nation. The State contains 42.5 million acres of forest land, ranking first in the United States. More than 18 million acres are capable of producing commercial forest crops. California has the second largest U.S. volume of standing timber.

About 16% of United States lumber production and substantial quantities of other wood products are manufactured in California. The State ranks third in timber cutting, third in lumber production, and third in plywood manufacture. In 1963 it was estimated that California ranked first in value of forest products sold and first in number employed in the timber industry with 108,000 employees. There are approximately 1400 timber operators, 300 sawmills, 49 veneer and plywood plants including 24 softwood producers, eight wood pulp mills, four particle board plants, one hardboard plant and many secondary wood using industries, e.g., planing mills, furniture, and paper, in California. It has been estimated that nearly 2.3 billion dollars was added to the economy in all timber-based economic activities in California in 1958. See Section H on manufacturing for statistics on employees and product value.

These industries are dependent upon a renewable resource—growing crops of trees—recognized as good business. Forests are vital to California also for watershed protection, recreation, and fish and wildlife.

More detailed data than that contained in the following tables are contained in *Present and Prospective Development of Timber Resources and Forest Industries* by Daniel Oswald, published by Pacific Southwest Forest and Range Experiment Station, *California's Timber Industries: Some Facts and Figures* (Berkeley, 1959), *A Century of Lumber Production in California and Nevada* (Berkeley, 1953) published by Pacific Southwest Forest and Range Experiment Station of U. S. Forest Service. See also *Production of California Timber Operators in 1967* (Sacramento, 1969) of California Division of Forestry and various U. S. Bureau of Census reports cited in the tables. Information concerning potential of woodpulp industry and waste disposal is found in *Waste Treatment and Disposal Aspects to Development of California's Pulp and Paper Industries* (Sacramento, 1957) published by State Water Quality Control Board.

The Economic Importance of Timber in the United States (Washington, D.C., 1963), published by the U. S. Forest Service, contains estimates of value added and employment for timber-based economic activities. *Economic Development Prospects for the Commercial Forest Resources and Forest Products Industries of California* (Berkeley, 1963), a Report to the State Office of Planning published by the University of California School of Forestry, contains much information on the forest resource and related industries including regional breakdowns of ownership, production, and resource data.

Timber Trends in the United States (Washington, D.C., 1965), published by the U. S. Forest Service, contains numerous statistics on California's timber industries and in addition is an appraisal of the timber situation and outlook in the United States.

Fishing

This section presents statistics of quantity, value, species, and disposition of fish caught for commercial and recreational purposes.

Information relative to fisheries and the recreational use of wildlife is available from the Department of Fish and Game. Data are published regularly in the annual *Statistical Report of Fresh, Canned, Cured and Manufactured Fishery Products;* annually in *The California Marine Fish Catch* (*Fish Bulletin* series); in the *Monthly Statewide Report of Receipts and Case Pack, Tuna and Other Species;* and in the monthly *Report of the California Party Boat Fleet* (sport-catch).

Mining

These tables present summary statistics of the quantity and value of mineral production in California, compiled by the Division of Mines and Geology and the Division of Oil and Gas, California Department of Conservation. Detailed county figures are available from these agencies.

The monthly publication, Mineral Information Service, provides information on geology and mineral resources of California, the usefulness of minerals and rocks, mineral discoveries and operations.

In addition, the Division of Mines and Geology issues mineral bulletins, special geologic reports, county mineral reports, geologic and mineral maps. The most recent edition of Mineral Resources of California was released in 1966 as Bulletin 191. It gives information on the geologic occurrence, economic development, and utilization of the State's mineral resources; price $2.

Detailed statistics on petroleum and natural gas production are published by the Division of Oil and Gas in the semiannual Summary of Operations, California Oil Fields, and the monthly Oil and Gas Production Report, both free.

Statistics of mineral operations in California will also be found in the reports of the U. S. Bureau of Mines and the Census Bureau.

TABLE G-1

TOTAL ACREAGE AND ACREAGE RECEIVING WATER SERVICE,[a] BY HYDROLOGIC STUDY AREA, CALIFORNIA, 1965
(In thousands)

Hydrologic Study Area	Total acreage	Acreage receiving water service	
		Gross irrigated[b]	Urban and suburban[c]
Total	100,207	8,875	2,200
North Coastal	11,265	270	47
San Francisco Bay	3,656	133	441
Central Coastal	7,315	404	99
South Coastal	6,985	447	1,030
Sacramento Basin	16,714	1,589	222
Delta-Central Sierra	3,109	791	51
San Joaquin Basin	7,017	1,297	73
Tulare Basin	11,076	3,050	159
North Lahontan	3,643	127	6
South Lahontan	17,263	94	29
Colorado Desert	12,164	664	43

[a] Based on land and water use surveys conducted by the Department of Water Resources, indicative of 1965 level of development.
[b] Includes farm lots and minor included acreages not receiving water service, such as roads, railroads, rights of way and other nonagricultural parcels of land.
[c] Estimated from population and density data.

TABLE G-2

MEAN ANNUAL RUNOFF OF CALIFORNIA STREAMS, BY HYDROGRAPHIC AREA[a]
(In thousand acre-feet)

Area	Annual runoff[b]	Percent of total
Total	70,798	100.0
North Coastal[c]	28,886	40.8
San Francisco Bay[c]	1,245	1.8
Central Coastal	2,448	3.4
South Coastal	1,227	1.7
Central Valley	33,636	47.5
Sacramento River Basin	22,390	31.6
Tulare Lake Basin	3,313	4.7
San Joaquin River Basin	6,386	9.0
Delta tributary area[d]	1,647	2.2
Lahontan	3,177	4.5
Colorado Desert	179	0.3
Colorado River above Gila River	[e]16,182	

[a] Hydrographic Areas correspond essentially to Hydrologic Study Areas, except as indicated in footnote "c" below. North and South Lahontan combined.
[b] Estimated average natural runoff for water years 1894–95 to 1946–47. Water year is 12 months ending September 30.
[c] Runoff of Russian River Basin and Salmon Creek Group (the latter tributary to Bodega and Tomales Bays), amounting to 1,743 thousand acre-feet, included in North Coastal total.
[d] Corresponds essentially to Delta-Central Sierra Hydrologic Study Area.
[e] Estimated average natural runoff for water years 1904–05 to 1947–48.

TABLE G-5

AGGREGATE GROSS CAPACITIES OF RESERVOIRS IN CALIFORNIA,[a] BY HYDROGRAPHIC AREA[b]
January 1, 1969
(In acre-feet)

Hydrographic area	Aggregate capacity[c]
Total	38,668,789
North Coastal[d]	3,945,342
San Francisco Bay[d]	893,010
Central Coastal	1,329,400
South Coastal	2,575,396
Central Valley	27,294,029
Sacramento Basin	16,186,003
San Joaquin-Tulare Lake Basin[e]	11,108,026
Lahontan	1,800,587
Colorado Desert[f]	831,025

[a] All reservoirs in California with gross capacities of 1,000 acre-feet or more. Includes reservoirs constructed by federal and state agencies, as well as those constructed by local agencies, concerns and persons. Excludes capacities of reservoirs to be inundated by new construction.
[b] Hydrographic Areas correspond essentially to Hydrologic Study Areas, except as indicated in footnotes "d" and "e," below. North and South Lahontan combined.
[c] Totals include reservoirs under construction.
[d] Reservoirs of Russian River Basin and Salmon Creek Group (the latter tributary to Bodega and Tomales Bays) included in North Coastal total.
[e] Includes Delta-Central Sierra Hydrologic Study Area.
[f] Includes Parker Reservoir on Colorado River.

ESTIMATED ANNUAL REQUIREMENTS FOR WATER, BY HYDROLOGIC STUDY AREA, CALIFORNIA, 1965
(In thousand acre-feet)

Hydrologic study area	Type of water service	
	Irrigation	Urban and suburban
Total	29,284	4,153
North Coastal	653	37
San Francisco Bay	268	791
Central Coastal	1,084	137
South Coastal	1,113	2,010
Sacramento Basin	6,007	433
Delta-Central Sierra	2,263	112
San Joaquin Basin	4,535	149
Tulare Basin	8,897	340
North Lahontan	383	15
South Lahontan	515	55
Colorado Desert	3,566	74

Note: Water requirements listed here correspond to acreages receiving water service, as shown in Table G-1. Footnotes [a] and [b] of that table apply to this table as well. Urban and suburban requirements are based on population and per capita use data.

Owens below Long Valley Dam	437	34,850	59,950	58	130,060	141,850	92
Colorado Desert Area							
Colorado, inflow to Lake Powell	107,900	[i]7,247,000	8,172,700	89	[i]10,854,000	11,910,900	91

[a] Selected streams, generally indicative of water supply. All runoff data preliminary, subject to revision.
[b] Measured flow, adjusted for upstream storage, diversions, and imports.
[c] Snowmelt period; indicates adequacy of water supplies.
[d] Period generally between successive annual low flows.
[e] 1915–16 through 1964–65; estimates for stations having shorter records obtained by correlating with nearby long-term stations.
[f] Nonsnowmelt stream.
[g] Measured flow, not adjusted for upstream regulation.
[h] Including Delta tributaries.
[i] Adjusted for regulation of Upper Colorado Storage Project Reservoirs.

TABLE G-9

WATER QUALITY DATA
SELECTED GROUND WATER BASINS, CALIFORNIA, 1965

Ground water basin	No. wells sampled, 1965[a]	Total dissolved solids (mg/l)[b]			Total hardness[c] (mg/l)		
		Max.	Min.	Median	Max.	Min.	Median
Smith River Plain	10	173	50	134	122	23	75
Sacramento Valley	199	2,970	118	313	1,260	11	151
San Joaquin Valley	486	6,400	45	350	3,900	6	160
West Coast Basin (Los Angeles Co.)	272	[d]41,397	254	1,985	8,482	9	256
Chino Basin (San Bernardino County)	97	1,417	132	305	782	13	200
Coachella Valley	17	1,080	140	420	269	18	170

[a] Some of the indicated wells are sampled more than once during the year. In this table, each of these wells is represented by only one analysis.
[b] Milligrams per liter, equivalent to parts per million.
[c] Expressed as calcium carbonate in milligrams per liter. In general, hardness above 200 mg/l requires softening for domestic use.
[d] Excessive mineral concentrations caused by sea water intrusion.

Bishop	1	P	464	409	322	483
El Centro	1	P	1,628	1,762	1,870	1,951

[a] Gross water supplies or net water deliveries.
[b] P: water produced; D: water delivered.
[c] Fiscal year—July 1 to June 30 of successive calendar years.
[d] Within city limits.
[e] Metered consumption within area normally served.
[f] Quantities for calendar year (first year indicated in each column heading).
[g] Total deliveries of Colorado River water. Includes part of water supply for Long Beach, Los Angeles, and San Diego, listed above.

EXPLANATORY NOTE: This list of 94 major dams in California includes only those which are over 190 feet high or have reservoirs of at least 100,000 acre-feet capacity. There are more than 1,000 dams within the safety jurisdiction of the State, which is exercised over dams which are 25 feet or more high, storing more than 15 acre-feet of water, or, which are more than 6 feet high storing at least 50 acre-feet. Federally operated dams, 21 of which are listed here, are exempt from State safety supervision.

The "height" listed is the vertical distance from the crest of the dam to the original streambed at the downstream toe of the dam.

[a] List of abbreviations:
USBR—United States Bureau of Reclamation
CDWR—California Department of Water Resources
USCE—United States Corps of Engineers
MCFC&WCD—Monterey County Flood Control & Water Conservation District
PG&E—Pacific Gas and Electric Company
SCVWCD—Santa Clara Valley Water Conservation District
LACFCD—Los Angeles County Flood Control District
MWD—Metropolitan Water District of Southern California
ID—In name of builder refers to Irrigation District
EBMUD—East Bay Municipal Utility District
SMUD—Sacramento Municipal Utility District

[b] List of abbreviations (Purpose of dam):
Mult. purp.—Multiple purpose
Stor.—Storage
Div.—Diversion
Reg.—Regulation
Fl. cont.—Flood control
Deb. cont.—Debris control

[c] List of abbreviations (Use of water):
Irr.—Irrigation
Pwr.—Power
Rec.—Recreation
Mun.—Municipal
Dom.—Domestic
Ind.—Industrial

[a] Cleaned basis, yield in pounds, production in cwt.
[b] Yield in pounds net lint; production in 500 pounds gross weight bales; price on cwt. basis.
[c] Produced on the same acreage as estimated for cotton lint.
[d] Yield in pounds.
[e] Price on a hundredweight basis.
[f] Related to year of harvest. It also includes some acreage carried over and harvested the following spring. Prices do not include Gov't payments under the Sugar Act. 1968 price and value are based on U.S. average price.

SECTION H.

MANUFACTURING

This section presents data on manufacturing industries summarized from the U.S. Census of Manufactures and the annual surveys conducted by the U.S. Bureau of the Census. Detailed information for individual industries and local areas is available in the published reports of the Bureau of the Census. Except for 1958, 1963, and 1967, the statistics are based on sample surveys. In 1958, 1963, and 1967, complete censuses were taken.

All employees—Includes all full-time and part-time employees on the payroll of the operating establishment. For 1959–62 and 1964–66, all employees represents the average number of production workers employed for the payroll period ended nearest the 15th of March, May, August, and November plus all other employees for the payroll period ended nearest the 15th of March. For census years it represents an average of reported employment totals for the payroll period ended nearest the 15th of March, May, August, and November. The figures include data for central administrative offices and auxiliary establishments.

Payroll—Includes salaries, wages, commissions, bonuses, vacation pay, and other remuneration paid during the year to all employees of the establishment. Payroll is reported before deductions for Social Security, income tax, group insurance, union dues, etc.

Production workers—Includes workers engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plants' own use (e.g., power plant), record keeping, and other services closely associated with production operations. Supervisory employees above the working foreman level are excluded from this category.

Wages—Payroll paid to production workers.

Value added by manufacture—Derived by subtracting the cost of raw materials, parts and components, supplies, fuels, purchased electricity, goods purchased for resale, and contract work from the value of shipments of manufacturing establishments in each industry and adjusting for the net change in finished goods and work-in-process inventory between the beginning and end of the year plus the value added in merchandising activities of manufacturing establishments.

New capital expenditures—Includes, for all manufacturing plants in operation and under construction: expenditures for new structures and additions (including major alterations, capitalized repairs, and improvements) to the manufacturing plant, whether on contract or by the plant's own work force; new machinery and new equipment; and capitalized repairs and improvements to existing machinery and equipment. Excluded are expenditures for "used" plant and equipment acquired from others, and for land.

SECTION I.

DEFENSE-AEROSPACE

Information on California's largest single manufacturing sector, defense-aerospace, is obtained primarily from reports of the U.S. Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the California Department of Industrial Relations. Material from these and other sources has been summarized by the Department of Finance, Budget Division.

Table I-1 summarizes all DOD prime awards for procurement actions of $10,000 or more, and includes those for research and development (R&D), shown separately in Table I-3. NASA totals include awards of $10,000 or more for R&D and to educational and nonprofit institutions, and of $25,000 or more for all other contracts.

Prime contract awards are given to the manufacturer who will assume primary responsibility for coordination, testing, production or similar activities related to a project. The primary contractor, in turn, generally sub-contracts to other firms approximately half the initial award. These subcontracts may or may not be made to other firms in the state of the primary contractor. Adequate information is not available by which to determine the overall position of California firms in DOD and NASA primary and subcontracting.

The information on scientists was gathered by the National Science Foundation through a mail questionnaire, sent to members of 12 scientific societies cooperating with the Foundation. Persons belonging to these societies have been classified as scientists and have been included in the National Register of Scientific and Technical Personnel. Of the 1966 respondents, 37 percent reported a doctorate as the highest degree, 28 percent had a master's degree and 30 percent held a bachelor's degree. Because of the substantial number of nonrespondents and incomplete coverage of the scientist population, the data on scientists should not be regarded as the total number of persons in the professional activities listed.

Division of Labor Statistics and Research

SECTION J.

CONSTRUCTION

This section presents annual statistics on California building permits issued for housing units and various types of other construction. These statistics are compiled by the Bureau of the Census, U.S. Department of Commerce. Two sets of building permit data are currently reported by the Bureau of the Census. One set is based on approximately 13,000 permit-issuing places known in the United States; the other set relates to 3,014 selected permit-issuing places in which permits were issued for at least 50 housing units during 1959. In 1966 these selected places accounted for 84 percent of all housing units authorized in the United States.

Because various data in the 3,014-place series are reported more frequently, in greater detail, and are regularly published in the *Construction Review*, the detailed data on value of permits included in the tables that follow are based on these series. For California these data series are obtained from 245 of approximately 400 permit offices in the State, and in 1966 represented about 92.5 percent of the housing units authorized in the State. The number of residential units shown for metropolitan areas in Table J-4 is based on the 13,000 permit-issuing place series.

Current monthly data on new residential construction authorized in permit-issuing places for the United States, California and local areas are given in various construction reports, published by the Bureau of the Census. Detailed description of building permit data is available in the 1965 summary statistics of the Bureau's publication: *Housing Authorized in Permit-Issuing Places* (C-42-65-13).

Private new nonresidential construction data for California has been prepared from special tabulations furnished by the Bureau of the Census, Construction Statistics Division.

TABLE J-1

CALIFORNIA BUILDING PERMIT ACTIVITY: VALUATION BY TYPE OF BUILDING CONSTRUCTION, 1966–68

(In millions)

Type of building construction	1966	1967	1968
All building construction	$3,451.4	$3,547.5	$4,589.7
New housing units	1,548.1	1,704.3	2,522.0
New nonhousekeeping	38.0	36.2	86.0
New nonresidential building	1,375.7	1,328.3	1,895.8
Commercial	682.5	625.7	632.8
Amusement and recreational	22.3	27.1	45.1
Gasoline and service stations	30.2	31.2	31.2
Office, bank and professional	332.1	296.0	278.0
Stores and other mercantile	297.9	271.5	278.5
Community	223.2	228.7	216.5
Churches and other religious	62.5	46.9	37.5
Hospitals and other institutional	87.3	86.4	125.1
Schools and other educational	73.4	95.4	53.9
Residential garages and carports	14.0	13.6	18.8
Industrial	253.3	276.8	338.3
Other nonresidential building [a]	202.6	183.5	203.0
Additions and alterations	489.6	478.7	486.4

[a] Includes parking garages, public works and utilities buildings, other nonresidential buildings, and structures, other than buildings.

SECTION K.

TRANSPORTATION

Statistics relating to the mileage of roads, expenditures to construct and maintain these roads, gallons of fuel used, and traffic and accident data on all freeways and on rural State highways are maintained and were compiled for publication by the Urban Planning Department of the Division of Highways, Department of Public Works.

The Highway Planning Survey inventoried all roads outside the incorporated areas during the period 1949-55. The counties are required to maintain the inventory of the roads under their jurisdiction and report changes in mileage in May of each year.

The accident statistics contained in this report are based upon fatal and injury accidents involving a motor vehicle. The reports from which these statistics are compiled are those required to be reported to the California Highway Patrol under Section 20008 of the Vehicle Code. Accidents involving "property damage only" are not required to be reported and, consequently, do not reflect an accurate total.

In addition to the accident data contained in this report for 1968, the Department of California Highway Patrol also received an additional 4,260 reports of motor vehicle accidents which occurred on private property. These accidents resulted in death for 180 persons and injury to 5,000 persons.

World Trade Statistics

The dollar value of foreign trade, as compiled by the United States Department of Commerce, is presented for the three customs districts: Los Angeles, San Diego, and San Francisco.

Leading exports are: food and live animals, with fruit and dried milk playing an important role; crude materials, with raw cotton the number one export; chemicals, including inorganic and hydrocarbons; and machinery and transportation equipment, including non-electrical machine appliances.

Leading imports are: food products, half of which is green coffee; mineral fuels, mostly petroleum; manufactured goods, including newsprint and iron and steel plate; and machinery and transportation equipment, including automobiles and telecommunication equipment. Textile clothing is also becoming an important import.

The statistics on tonnage of inbound and outbound oceanborne cargo were compiled from U.S. Dept. of Commerce publications.

Other information sources on California world trade and shipping may be obtained from World Trade Center Libraries, San Francisco.

TABLE K-1

STATE HIGHWAY MILEAGE,[a] BY SURFACE TYPE, DECEMBER 31, 1968

Surface type	Total	Outside cities	Inside cities
Total	16,484	13,983	2,501
Total constructed road	14,397	12,282	2,115
Portland cement concrete	2,073	1,322	751
High type bituminous	9,083	7,861	1,222

TABLE K-15

DRIVER CONTROL ACTIONS, BY TYPE OF ACTION, CALIFORNIA, 1950–68

Year	All types	Probation[a]	Suspension[b]	Revocation[c]	Cancellation[d]
1950	32,710	7,571	17,072	6,174	1,893
1955	57,938	16,988	27,065	11,945	1,940
1960	93,581	17,534	54,329	17,798	3,920
1961	125,104	18,093	73,706	28,125	5,180
1962	116,303	23,690	59,800	26,761	6,052
1963	136,849	26,957	69,037	33,182	7,673
1964	163,775	32,732	84,303	38,345	8,395
1965	178,466	33,756	92,813	42,621	9,276
1966	166,459	38,465	83,453	34,700	9,841
1967	176,518	39,219	94,199	32,032	11,068
1968	189,653	52,146	96,647	29,609	11,251

[a] Formal action placing the driver on notice of the imminence of suspension or revocation upon continued violation.

[b] Temporary withdrawal of the driving privilege with the surrender during the term of suspension of all licenses. At the end of the suspension the license is returned.

[c] Person's driving privilege is terminated and all licenses issued must be surrendered. The revocation is for an indefinite period and must be ended by the Department, at which time the applicant must apply for and be issued a new license before driving.

[d] License certificate is withdrawn without prejudice and must be surrendered. Any person whose license has been cancelled may immediately apply for a license.

[a] H.B.D. Accidents are those where one or more drivers had been drinking (not necessarily under the influence of alcohol).

Department of The California Highway Patrol

TABLE K-21

FINANCIAL RESPONSIBILITY REPORTS RECEIVED, PERCENTAGE OF INSURED, SECURITY DEPOSITS, AND SUSPENSIONS EFFECTED 1950–68

Calendar year	Accident reports received	Percent insured drivers	Security deposits	License suspensions effected
1950	266,974	78.1	$571,509	28,238
1955	374,797	85.3	786,088	30,956
1960	535,643	88.1	1,347,228	35,618
1961	554,318	86.1	1,546,299	40,037
1962	605,286	88.4	2,094,548	45,118
1963	649,801	88.5	2,402,000	48,713
1964	702,346	89.4	2,818,031	49,948
1965	712,784	89.2	2,778,354	53,637
1966	725,649	89.0	3,058,682	67,751
1967[a]	753,600	88.1	3,052,904	114,000
1968	630,097	87.6	2,924,131	97,829

[a] The 1967 license suspension effected figure is not comparable with prior year data. On November 1, 1966 a new procedure was instituted and the 1967 figure shows license suspension orders mailed rather than license suspensions effected.

[b] Effective November 8, 1967 the reporting level changed to $200 damage to the property of any one person. Prior to that date an amount of $100 in such damage was reportable.

SECTION L.

PUBLIC UTILITIES

This section presents statistics summarizing the operations of public utilities in California. Tables L-6 and L-7 cover telephones placed by Pacific Telephone and the Independent Telephone Companies. Tables L-8 to L-10 present typical monthly utility bills in selected California cities. More detailed data on any of the utilities can be obtained from the Public Utilities Commission.

1967	100,454	27,755	66,270[e]		--	6,429

[a] Certain data, including all irrigation data, corrected since publication of 1963 edition of *California Stotisticol Abstract.*

[b] Includes all rural use other than irrigation.

[c] Includes energy used for pumping by the U.S. Bureau of Reclamation for the Central Valley Project. For 1965 through 1967, irrigation pumping included in Commercial and Industrial class.

[d] Includes energy used by Metropolitan Water District of Southern California for pumping Colorado River water through its main aqueduct, as well as use by other public agencies, railroads and street railways, and by electric utilities for plant operation.

[e] Equivalent subdivision of commercial and industrial use not available.

NOTE: Total quantities shown in this table differ from those in Table L-1 for two reasons. In the first place, some of the energy used in California is generated outside the State (and vice versa). Second, and more important, transmission and distribution losses are not included in L-2.

Source: For years 1950–64, Federal Power Commission, Regional Office, San Francisco, records; records of agencies indicated in footnotes [c] and [d]. For 1965, Edison Electric Institute (EEI) *Annual Statistical Year Book*, and records of Metropolitan Water District. For 1966 and 1967, *EEI Annual Statistical Year Books.*

SECTION M.

TRADE AND SERVICES

This section presents information on wholesale and retail trade in California as these are reflected in the Census of Business and taxable sales data, and on services as reflected by census data and the licensing activities of the state agencies which examine and license professional and vocational personnel and establishments.

Tables M-1 through M-4, M-14 and M-15 summarize 1963 Census data on wholesale trade, retail trade, and selected services in California. Additional information is available from the final census reports for the State, issued by the U.S. Department of Commerce, Bureau of the Census.

Total wholesale trade figures include merchant wholesalers (also shown separately), manufacturers' sales branches, petroleum bulk terminals, merchandise agents and brokers, and assemblers of farm products. The merchant wholesaler group is by far the largest of these, accounting for 71.3 percent of all wholesaling establishments and 44.1 percent of all sales. Merchant wholesalers include all establishments primarily engaged in buying and selling merchandise on their own account.

Retail trade data cover all items sold through retail outlets or by nonstore retailers. The latter group includes mail-order houses, merchandise vending machine operators and direct (house-to-house) selling organizations. Retail trade figures from the 1963 Census therefore differ substantially from the taxable sales data, which exclude all items not subject to the California sales tax—notably food for home consumption and gasoline. The number of retail establishments is based on those in operation during November, 1963, and is lower than the number of taxable sales permits issued during the year. The latter category not only includes retail firms that have gone out of business during the year, but also manufacturers, wholesalers, and itinerant vendors making retail sales.

Service data include only major activities, which, however, account for most of the persons engaged in the service sector: hotels, motels, and tourist camps; personal services; miscellaneous business services; automobile and miscellaneous repair services; motion pictures; and other amusement and recreation services. These activities are reported essentially in their entirety. Excluded are medical, legal, and educational services; museums, art galleries, and botanical and zoological gardens; nonprofit membership organizations; and private household and miscellaneous services.

Taxable sales data. Detailed statistics are given in tables M-7 through M-13 on the number of outlets and the amount of taxable transactions of establishments licensed by the State Board of Equalization to sell tangible personal property. For the State as a whole and for each of the eight most populous counties, data are shown for 40 classes of retail business and for three categories covering all licensed non-retail business. For 20 other counties data are shown in considerable but somewhat less detail. Totals for retail stores and for all permittees also are shown for each county and city in the State.

More detailed data by type of business for cities whose annual retail store sales exceeded $100,000,000 in 1966 published for selected years in Table M-13 in the 1968 Abstract are not available on a comparable basis for calendar 1968. Consequently, this table has been eliminated from this year's Abstract but will be restored in the 1970 Abstract when two years of data on a comparable basis will again become available.

In general, outlets are classified according to the seller's principal line of business, using the Standard Industrial Classification developed by the United States Bureau of the Budget. Certain types of business selling only merchandise not subject to sales tax are not licensed and, consequently, are not represented in the statistics. The principal exclusions are establishments selling only food for home consumption, such as produce markets, meat and seafood markets, poultry stores, dairy stores, bakeries, etc.

The taxable transactions of retail stores may not be the same as their gross receipts because not all of their transactions are subject to sales tax. The principal exemptions from the tax are the sales of (a) food for home consumption, (b) gasoline, which is subject to the motor vehicle fuel license tax, (c) utility services when delivered to consumers through mains, lines, or pipes, (d) animal life used for human consumption, (e) feed, seed, plants, and fertilizers when used for the production of food for humans, (f) newspapers and periodicals, and (g) prescription medicines. For a complete list of exemptions see Sections 6351 through 6422.1 of the Revenue and Taxation Code of California. Also not included in taxable transactions are service charges, a source of receipts of many retail stores and all service establishments.

The statistics include purchases of equipment, fixtures, supplies, and material from outside of the State on which use taxes are reported and paid by the purchasers.

The machine tabulations that provide the basis for taxable transactions in the tables that follow are also the source for the data printed in the Trade Outlets and Taxable Retail Sales Reports published each quarter by the State Board of Equalization. As explained in the reports for the last two quarters of 1965, the tabulations were understated by $140 million in the third quarter and $237 million in the fourth quarter because of problems stemming from legislation that became effective on August 1, 1965. This legislation

required taxpayers whose taxable transactions exceeded $17,000 in either the first or second month of a quarter to pay 90 percent of their state sales tax receipts for each such month on or before the 25th of the following month and to file their quarterly returns on or before the 25th of the month immediately following the end of the quarter.

Problems inherent in the prepayment program as originally adopted together with difficulties in obtaining taxpayer understanding and compliance prevented completion by required cutoff dates of paperwork necessary for machine processing of a sizable number of tax returns filed for the last two quarters of 1965. Consequently, a portion of the taxable sales data was excluded from the 1965 machine tabulations and resulted in an understatement of such sales printed in the tables of the Board's "Trade Outlet" reports for the final two quarters of 1965. In order to present an accurate picture of taxable transactions for 1965 in the tables in this publication, the tax returns excluded from the machine tabulations were manually tabulated and adjustments were made to correct the sales data *for each class of business* shown for the State as a whole. A lack of resources prevented similar detailed adjustments for counties or any of the smaller cities. Aggregate taxable transactions shown for each county in Table M-9 were also adjusted to correct any understatements of tabulated data.

The system used for clearing up unprocessed third- and fourth-quarter returns of 1965 caused 1966 first-quarter taxable transaction tabulations to include prior-quarter understatements. Consequently, the machine tabulations of 1966 first-quarter data were overstated by the same amount as the 1965 data were understated. The 1966 sales data for each class of business for the State as a whole were manually adjusted to the correct amounts. Furthermore, for each county for which class of business data are printed in Tables M-11 and M-12, an adjustment was made to the total taxable transaction figure by showing the overstatement as an unallocated amount.

The adjustments made to the taxable transaction data that are printed in this volume were described above in order to point out to users of the Board's quarterly Trade Outlets and Taxable Retail Sales Reports the reasons for discrepancies between the data in the two publications. With the exception of class of business detail for counties, the figures through 1966 printed in Tables M-7 through M-13 of this volume are correct.

A new set of problems adversely affecting the comparability of sales tax data occurred in the third quarter of 1967 when the State's sales tax rate was increased to four percent on August 1, for most but not all taxable transactions. These two factors gave rise to a situation that made it virtually impossible to continue the reporting system initiated in 1946. The adoption of a rate increase in mid-quarter created some reporting complications which again delayed the filing of returns and introduced some taxpayers' reporting errors which took time to resolve. Most important, however, was the fact that the tax rate increase did not apply to sales or purchases of materials and fixtures involved in fixed-price construction contracts signed prior to August 1, 1967. This change made it impossible to utilize state tax receipts for deriving taxable transactions. To overcome this dilemma it was necessary to utilize local sales and use tax payments as a basis for establishing taxable transactions. The local base unfortunately differs from the state base because certain transactions of common carriers, waterborne vessels, and public utilities subject to state sales tax are exempt from local tax.

To overcome the latter deficiency it was necessary to tabulate locally-exempt transactions manually by class of business and to supplement the local base accordingly. In the last six months of 1967 these exemptions totaled $313,337,500. Through this procedure it was possible to produce statewide taxable transactions by type of business that are fully comparable to figures previously published.

Ninety percent of the locally-exempt transactions identified were reported by multiple-outlet concerns which are not required to provide the detail that would permit the allocation of the exempt transactions to the appropriate local jurisdictions. In view of this situation, it was impossible to allocate the exempt amounts reported on the returns of these taxpayers to the appropriate counties or any of their cities. Accordingly, $288,585,000 of transactions by concerns claiming local use tax exemptions could not be allocated to the counties which would have received credit for such transactions if the state base had been utilized as the basis for compiling taxable transactions. This figure is included in the unallocated amount for 1967 in Table M-9.

Moreover, state tax payments from which taxable transactions were heretofore established had always been credited to the jurisdiction in which the taxpayer's place of business is located. The incidence of the local tax, however, may differ from that of the state tax. Insofar as certain taxpayers are concerned, primarily construction contractors and many suppliers who sell and install building materials, the incidence of the local sales tax occurs at the job site instead of at the taxpayer's place of business. To the extent that places of business of such taxpayers are not located in the same county as their job sites, the county data for 1967 are not comparable with those for prior years. Since most building materials and supplies are used by the contractor or installer in the same county in which his place of business is located, any lack of comparability of the county figures between 1967 and prior years will be rather small except for the $288,585,000 referred to in the preceding paragraph.

Taxable sales data for 1968 for counties and cities are not comparable with those reported in prior Abstracts. In view of this situation several new tables—notably M-9A, M-11A and M-12A have been added. The taxable sales data in these new tables are based on transactions subject to local sales and use taxes while those printed in earlier Abstracts, as previously mentioned, were based on transactions subject to state sales and use taxes. This substitution had to be made for several cogent reasons. First was the high cost of identifying transactions not subject to local tax and manually adding these to the figures developed through the computer one quarter and subtract-

ing them from computer controls for the following quarter. Second was the danger of not being able to identify all cases and thereby understating the figures. And finally, the added clerical effort required delayed the preparation and distribution of quarterly reports.

The Board of Equalization publishes quarterly reports containing outlet and taxable sales data by type of business for the State as a whole, for 56 counties and for 168 of the largest cities of the State as determined by the dollar volume of taxable transactions reported by retail stores for the preceding calendar year. These reports also contain outlet and taxable sales data for retail stores and for all outlets for all California cities.

Since 1960 an Annual Report of outlet and taxable sales data has been issued by the board. This series contains detail on taxable sales by type of business for 240 cities.

Licensed professional and vocational personnel and establishments. Statistics are presented giving the numbers of licensed professional and vocational personnel and the licensed establishments based on operating statistics of the Department of Professional and Vocational Standards. The growth of activity in the licensed professions and vocations can be inferred from the data presented, but it must be noted that no direct measure is available of the volume of professional and vocational services provided by the licensees.

TABLE M-6

APPARENT CONSUMPTION [a] OF ALCOHOLIC BEVERAGES IN CALIFORNIA, BY TYPE OF BEVERAGE, 1950–68

(In thousands of gallons)

Year	Beer	Still wines		Sparkling wine	Distilled spirits
		14 percent alcohol or less	Over 14 percent alcohol		
1950	162,484	6,909	14,535	293	18,592
1955	185,740	10,008	15,848	463	20,953
1960	232,402	15,201	17,006	915	27,456
1961	238,306	16,435	17,328	996	29,243
1962	251,695	17,464	16,696	1,074	31,304
1963	265,779	19,441	16,646	1,204	32,509
1964	281,916	21,291	16,596	1,502	35,654
1965	290,277	23,134	16,379	1,730	37,261
1966	305,025	23,609	15,410	1,960	38,828
1967	313,438	26,117	14,996	2,228	40,127
1968	328,629	29,597	14,540	2,533	42,016

[a] Except for tax-exempt distributions of beer to the armed forces which have been included in beer distributions, the figures in this table represent taxable distributions and are compiled from the monthly tax returns of the taxpayers. Because the tax liability attaches at the time alcoholic beverages are sold by manufacturers or importers rather than at the time a retail sale is made or when the consumption occurs, the above data are referred to as *apparent* consumption figures rather than as *actual* consumption figures.

TABLE M-7

NUMBER OF SALES TAX ACCOUNTS [a] AND OUTSTANDING PERMITS TO SELL TANGIBLE PERSONAL PROPERTY ISSUED UNDER THE CALIFORNIA SALES AND USE TAX LAW ON JULY 1, 1960–68

Year	Number of permits [b]	Number of accounts [b]
1960	346,706	324,584
1961	351,540	327,509
1962	355,403	332,215
1963	362,614	337,626
1964	372,387	345,471
1965	381,203	351,501
1966	389,867	357,719
1967	392,705	359,311
1968	401,980	366,775

[a] Includes all manufacturers, wholesalers, and retailers of tangible personal property except those dealing solely in commodities (such as cereal products) the retail sales of which are exempt from tax.

[b] A firm usually has only one account regardless of the number of its outlets, but it has as many permits as it has outlets. Excludes holders of certificates of registration use tax.

TABLE M-8

TOTAL SELF-ASSESSED TRANSACTIONS [a] TAXABLE UNDER THE SALES AND USE TAX LAW, BY CALENDAR QUARTER, 1950–68

(In thousands)

Year	Total	1st quarter	2nd quarter	3rd quarter	4th quarter
1950	$12,258,611	$2,552,837	$2,932,176	$3,342,279	$3,431,319
1955	17,993,543	3,903,219	4,476,600	4,631,014	4,982,710
1960	23,361,394	5,407,484	5,875,808	5,832,070	6,246,032
1961	23,987,415	5,320,043	5,876,823	6,063,901	6,726,648
1962	25,969,082	5,749,141	6,455,567	6,431,743	7,332,631
1963	27,892,155	6,200,974	6,869,238	6,998,268	7,823,675
1964	30,264,770	6,872,679	7,551,568	7,644,134	8,196,389
1965 [b]	31,908,172	7,192,736	7,735,912	8,049,376	8,930,148
1966 [c]	34,236,477	7,736,783	8,588,268	8,571,155	9,340,271
1967	35,122,105	7,895,248	8,604,666	8,914,900	9,707,291
1968	39,006,935	8,611,602	9,627,583	9,969,545	10,798,205

[a] Self-assessed taxable sales reported by concerns doing business in California and self-assessed purchases of Californians subject to use tax. Does not include board-assessed sales, which over the period covered by the table ranged from $20,000,000 to $150,000,000 a quarter. Does not include sales of gasoline and other high-test motor vehicle fuel, sales of food for off-premises consumption, sales of water, electricity, and gas when delivered through pipes or wires, and other tax-exempt sales.

[b] Third- and fourth-quarter figures have been adjusted to correct the deficiencies described in the introduction to this section.

[c] First-quarter figures have been adjusted to correct the overstatements described in the introduction to this section.

Napa	123,387	Yuba	68,680
Nevada	39,292	Unallocated	744,846
Orange	2,391,968		

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Taxable sales figures for 1968 are not comparable to those for prior years chiefly because they were compiled from *local* instead of *state* sales and use taxes; in 1968 the local tax base was 1.8 percent less than the State's. This variation is not spread uniformly among the cities and counties; in fact, the nature of the local tax exemptions is such that they are likely to involve considerable variation from area to area.

Board of Equalization
Research and Statistics

[a] Includes all manufacturers, wholesalers, and retailers of tangible personal property except those dealing solely in commodities (such as cereal products) the retail sales of which are exempt from tax.

[b] Sales or purchases made, with minor exceptions, during the calendar year.

[c] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and effective January 1, 1962, prescription medicines.

Unallocated	--	--	—22,275	--	--	--	—16,133	--

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and effective January 1, 1962, prescription medicines.

[c] County totals have been adjusted, as indicated in the introduction to this section, to the correct amounts. The adjustments are shown as unallocated amounts because they could not be allocated to type of business.

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Taxable sales figures for 1968 are not comparable to those for prior years chiefly because they were compiled from *local* instead of *state* sales and use taxes; in 1968 the local tax base was 1.8 percent less than the State's. This variation is not spread uniformly among the cities and counties; in fact, the nature of the local tax exemptions is such that they are likely to involve considerable variation from area to area.

[c] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and prescription medicines.

Board of Equalization
Research and Statistics

[a] Sales or purchases made, with minor exceptions, during the calendar year.

[b] Taxable sales figures for 1968 are not comparable to those for prior years chiefly because they were compiled from *local* instead of *state* sales and use taxes; in 1968 the local tax base was 1.8 percent less than the State's. This variation is not spread uniformly among the cities and counties; in fact, the nature of the local tax exemptions is such that they are likely to involve considerable variation from area to area.

[c] Excludes tax-exempt retail sales comprised principally of sales of food for off-premises consumption, gasoline, and prescription drugs.

SECTION N.

BANKING AND FINANCE

This section presents bank, savings and loan association, and insurance statistics.

The bank statistics were supplied by the State Superintendent of Banks. The savings and loan statistics were made available by the Federal Home Loan Bank of San Francisco. Additional data may be obtained from these sources.

The State Superintendent of Banks issues an annual report on the financial condition of State Banks.

The insurance statistics are prepared by the California Department of Insurance. Detailed information is published in the Annual Report of the Insurance Commissioner, available from the Department.

SECTION O.

PUBLIC FINANCE

Data relating to the financial operation of governmental agencies in California are summarized in this section. The information is arranged according to the level of government, starting with the Federal and running through special districts. In general the purpose is to present figures on revenues, expenditures and debt, with additional details on each of these subjects where these can be readily prepared in summary form. Supplementary information is available in the files and records of the several contributing agencies.

A warning should be given against adding either revenues or expenditures of the several governmental levels and treating the result as the aggregate income or outgo of governments in California. A great deal of money passes from one level to another in the form of subventions and other intergovernmental payments. Consequently there is a substantial duplication in these figures which can be eliminated only after careful examination of the various items involved. Differences among governmental agencies in accounting practices, especially in regard to disbursements from proceeds of bond issues, also will require attention in using these data.

Federal taxation and expenditures. Annual reports of the United States Commissioner of Internal Revenue are the source of statistics on Federal tax collections in California. Collections within a particular state are not an accurate measure of the burden of Federal taxes paid by the people of that state. For example, 60 percent of the cigarette tax is collected in North Carolina and more than 80 percent of the motor vehicle excise tax is paid in Michigan. But the burden of these taxes is carried by cigarette smokers and vehicle users in all states. The ratio of Federal tax collections to the burden of Federal levies varies with changes in the tax structure, economic conditions and other factors. In general, however, the burden upon Californians exceeds the volume of Federal taxes collected here by ratios ranging between 10.4 percent [1] and 17.4 percent.[2] One of the most recent surveys indicated that in 1957-58 the estimated burden of Federal taxes in California exceeded gross collections by 13.6 percent.[3]

Data on Federal tax refunds, by states, are available for the last four fiscal years and they show an average refund of 9 percent of gross collections in California. This ratio should be kept in mind in connection with the data in Tables O-1 and O-2 which are reported on a gross basis.

Complete data on Federal expenditures by states are not available, but payments by the Federal government to state and local governments and transfer payments to individuals, organizations etc. are reported by states in the *Annual Report of the Secretary of the Treasury on the State of the Finances.* Amounts for California in selected recent years have been transcribed in two tables for this section. Attention is directed to the numerous footnotes in each annual report which because of space limitations cannot be repeated in this Abstract.

State revenues, expenditures and bonded debt. The summaries here presented are based upon budget classifications of State revenues and expenditures, with total income and outgo carried back to the 1929-30 fiscal year and detail provided for the period since 1950. Additional information may be obtained from the *Annual Report of the State Controller* and the *State Budget.* The last two entries shown in each table are estimates contained in the Governor's Budget as submitted to the Legislature.

Aggregate fiscal year revenues, segregated by general and special funds. are shown in Table 0-6. For the most part, general fund receipts are derived from broad levies and charges not earmarked for particular purposes, while special fund receipts are dedicated for use in special services. Sales, personal income and

1965	10,443,242	7,423,957	1,644,593	346,565	1,028,127
1966	11,085,100	8,094,710	1,689,423	364,064	936,903
1967	13,098,149	9,732,385	2,002,658	374,117	988,989
1968	15,455,808	12,280,947	1,768,630	371,331	1,034,901

[a] Receipts in the various states do not indicate the Federal tax burden, since taxes collected in one state are, in many instances, borne by residents of another. For example, the withholding taxes reported by employers situated near state boundaries include substantial amounts withheld from salaries of employees residing in neighboring states.
Data for 1961 through 1964 indicate that approximately 9 percent of gross collections in California are refunded.

[b] Individual income and employment taxes, reported separately through 1951, cannot be segregated in recent reports.

General note: Original reports from which these data were compiled contain extensive footnotes. These should be consulted by users interested in continuity of these series, comparability and other details.

[3] *Federal Taxation and Expenditures In The Several States,* The Library of Congress, Legislative Reference Service, July 29, 1960, Pages 7 and 14.

corporation taxes are examples of the former; motor vehicle taxes and fees, which must be used for activities related to highways, roads and streets, are the leading special fund levies. Receipts from some revenue sources are apportioned by law between the general fund and certain special funds. Since 1929-30 there have been a few changes in the fund designation of receipts, and in this respect the totals are not strictly comparable throughout the period covered.

Table 0-7 shows revenue collections from each of the principal sources, without regard to fund. Amounts represent accruals during the year to the collecting agency. Permit fees required in connection with such levies as the sales and motor vehicle fuel taxes are included with other receipts from these levies.

Expenditure data are summarized in accordance with the three principal sections of the budget; (1) State operations, which includes the expense of maintaining the various departments, boards, commissions and offices—including the legislative and judicial branches; (2) capital outlay—representing the cost of acquiring land, constructing and equipping new facilities, highway construction and similar expenditures; and (3) local assistance, which comprises State payments to local governments. Under State accounting practice, disbursements from proceeds of bond issues are treated as expenditures at the time the bonds are redeemed. Hence, initial payments from bond funds are not included in these totals.

Expenditures for the principal functions of government include amounts for all three of the general purposes mentioned above—State operations, capital outlay and local assistance.

The functional classification of State expenditures was revised in 1962 in order to conform this reporting so far as possible to the agency concept of governmental organization. The new classification is shown in Table 0-9. Detailed information regarding the activities and services comprising each function may be obtained from budget summaries.

Information regarding the State's bonded debt, as reported by the State Treasurer, is arranged to show both the general trend since 1950 and a detailed statement of the California State bonded debt as of June 30, 1968. Short term obligations are not included.

TABLE O-2

[a] Additional details are given in the source reports cited below.
[b] Includes undistributed depositary receipts and unclassified advance payments of excise taxes.

General note: Numerous changes in tax laws and reporting procedures have occurred during the period covered by these data. For the most part these are explained in footnotes contained in annual reports of the Commissioner of Internal Revenue, which should be consulted for such technical details. Detail may not add to totals because of rounding.

The State Treasurer and the California Bonding Picture—The State Treasurer has duties and responsibilities set forth both by the Constitution and by statute. Serving as banker for the State she receives all state revenues into the State Treasury and provides for the redemption of all state warrants. Her responsibility includes the determination of the cash needs of the State on a daily basis and for the investment of all surplus funds.

The investment earnings on the funds and accounts invested by the Treasurer earned in excess of $90 million during the 1968–69 fiscal year. Interest earned on investments is credited to the general fund and other funds of state government as provided by law.

The trust functions of the State Treasurer's Office, providing for the safekeeping of all state-owned securities and other personal property, increased steadily during the year. On June 30, 1969, securities held for state funds, deposited by banks to secure bank deposits and all pledges with state agencies and other safekeeping items, totaled over $7.5 billion.

All state general obligation bonds authorized by the people are prepared, sold, serviced and redeemed by the State Treasurer. Of the $4.7 billion bonds outstanding on June 30, 1969, approximately 60 percent is represented by self-liquidating bonds serviced by certain earmarked receipts other than general tax sources. In the 1968–69 fiscal year, state bond sales (including water revenue bonds and state colleges revenue bonds) totaled $424 million. The bids received on bond offerings continued to compare favorably with the national municipal bond averages.

Water Development Program Bonds—A total of $1,150 million of the $1.75 billion general obligation bonds authorized by the voters in 1960 under the Burns-Porter Act had been sold as of June 30, 1969. The Burns-Porter Act dedicates certain revenues of the project, remaining after provision for the expense of operation, maintenance and replacements, to the payment of the principal of and interest on the Water Bonds.

State School Building Aid Bonds—The continued population growth contributes to the demand for additional new classroom facilities for local elementary and high schools. The loans to local school districts remain fairly constant. Since its inception in 1947, some 56,000 classrooms housing 1.9 million pupils have been provided under this program. By June 30, 1969, a total of $1.615 billion in school building aid bonds had been sold of the $1.890 billion authorized by the electorate since 1949.

State Construction Program Bonds—The population growth combined with the accumulated need to modernize and replace existing older facilities required a construction program of a magnitude unmatched by any other state. A total of $1.02 billion of construction bonds had been sold as of June 30, 1969, of the $1.05 billion authorized.

Higher Education Construction Bonds—The electorate in 1966 approved a $230-million bond issue to provide construction of facilities for the University of California and the State College System. A total of $150 million of this issue was sold prior to June 30, 1968.

Veteran's Farm and Home Loan Bonds—This program has been entirely self-supporting since its inception, with the administration costs, bond redemptions and interest payments covered by veterans loan repayments. Since 1921 over 245,000 loans have been made to qualified California veterans. As of June 30, 1969, $1.255 billion of the veteran's bonds sold remain outstanding.

Harbor Development Bonds—Of the $60 million bond issue authorized by the voters in 1958, for harbor development, $50 million was designated for the San Francisco Port Authority. As of June 30, 1969, the entire issue had been sold.

Ten million dollars of the 1958 issue was made available for loans to cities, counties and districts for small craft harbors and related facilities. These bonds are also self-liquidating, as the revenue received for operation of the small craft facilities will repay the principal and interest on the bonds.

State Beach, Park, Recreational, and Historical Facilities Bonds—During 1965 the first bonds were offered for sale of the $150 million program to acquire and develop the state's outdoor recreational facilities approved by the people in 1964. The program provides that $85 million will be allocated for acquisition of property for the state park system and $40 million for grants to local governments for acquisition and development of property for park and beach purposes. In addition $20 million would be made available for minimum development of the property acquired for the state park and beach system, and $5 million to acquire and develop property for wildlife management. As of June 30, 1969, $75 million of the authorized total of bonds had been sold.

Junior College Construction Bonds—The $65,000,000 Junior College Construction Program Bonds approved by the voters in 1968 are both California's newest general obligation bonds and the first statewide bonds dedicated solely to the building programs of the two-year colleges.

Known collectively as community colleges because of their direct relation to community needs, these schools are first in growth in the three segments of higher education in California. There now are 89 community colleges operated and controlled by 69 separate junior college districts, and more are already planned to come into the system each year.

Under terms of the Junior College Construction Act of 1967, the program is administered by the California Community Colleges and each project is reviewed by the State Department of Finance, the State Public Works Board, and the Legislature to determine that the expenditures economically and properly fulfill established needs.

Sale of $15,000,000 of the bonds in November 1968 provided funds for the first projects to be approved.

TABLE O-12

ASSESSED VALUATION OF COUNTY-ASSESSED TANGIBLE PROPERTY, BY CLASS OF PROPERTY, 1950–69

(In thousands)

Year	Net total	Land	Improvements	Personal property	Exemptions[a]
1950	$11,997,430	$4,869,170	$5,673,627	$2,133,077	$678,444
1955	17,435,025	6,057,796	9,176,585	3,327 375	1,126,731
1960	25,816,377	8,616,697	14,041,111	4,713,256	1,554,687
1961	27,484,169	9,281,003	15,014,348	4,788,524	1,599,706
1962	29,120,774	9,928,731	15,944,276	4,893,902	1,646,135
1963	30,717,697	10,432,249	17,016,291	4,894,338	1,625,181
1964	32,301,234	11,428,391	18,091,555	4,375,946	1,594,658
1965	34,933,444	12,553,281	19,376,863	4,632,636	1,629,336
1966	37,894,456	14,052,734	20,450,777	5,051,519	1,660,574
1967	41,524,729	16,051,527	21,698,298	5,478,878	1,703,974
1968	43,945,744	17,316,226	22,521,601	5,869,107	1,761,190
1969[b]	47,412,523	19,352,721	23,834,354	6,004,762	1,779,314

[a] Enrolled exemptions include veterans' exemptions, churches, privately owned nonprofit colleges, privately owned orphanages, privately owned "welfare" (religious, charitable, and hospital) properties in 1946 and thereafter, privately owned nonprofit educational institutions of less than collegiate grade in 1953 and thereafter (except in Los Angeles County where they were first enrolled in 1957), and publicly owned properties in a few counties in some years.

[b] Because tax rates are set on assessed values before deduction of the $750 homeowner's exemption and the 15 percent exemption on business inventories and in order to maintain the comparability of this series of data, the values of the homeowner's exemption, $1,909,789,000, and the business inventory exemption, $475,340,000, are included in assessed values and excluded from exemptions. The homeowner's exemption excludes late filings under Chapter 899, Stats. of 1969.

1963–64	2,805,152	99,391	737,609	364,883	1,443,817	159,452
1964–65	3,054,072	104,808	804,908	383,006	1,582,610	178,740
1965–66	3,367,736	116,662	880,546	407,868	1,760,874	201,786
1966–67	3,760,608	126,192	959,509	446,142	1,997,057	231,708
1967–68	4,110,742	128,227	1,061,415	475,925	2,195,862	249,313
1968–69	4,569,986	139,621	1,177,484	521,737	2,449,101	282,043

[a] Excludes special assessments levied on limited categories of property to finance activities from which such properties derive special benefits.

[b] County levies for school purposes, such as junior college tuition and countywide school levies, are included with school district levies.

NOTE: Ad valorem taxes are levies on all taxable real and personal property as it exists at 12:01 a.m. on the first day of March. To the assessed valuation of taxable property are applied the tax rates of the several taxing jurisdictions within which the property is situated.

Board of Equalization
Research and Statistics

TABLE O-15

AVERAGE TANGIBLE PROPERTY TAX RATE,[a] BY LEVEL OF GOVERNMENT, 1951–69

(Rate per $100 of assessed value)

Fiscal year	Total levies[b]	City and County of San Francisco levies	Other county levies[c]	Other city levies[d]	School district levies[c]
1950–51	$5.81	$4.67	$2.02	$1.72	$2.36
1955–56	6.27	5.25	2.04	1.67	2.72
1960–61	7.42	6.18	2.11	1.59	3.69
1961–62	7.65	6.13	2.13	1.58	3.89
1962–63	7.82	6.83	2.18	1.60	3.97
1963–64	8.00	6.29	2.20	1.61	4.12
1964–65	8.31	6.39	2.29	1.61	4.31
1965–66	8.53	6.91	2.33	1.58	4.46
1966–67	8.84	7.16	2.35	1.60	4.70
1967–68	8.90	5.92	2.41	1.58	4.75
1968–69	9.39	6.36	2.53	1.63	5.03

[a] Computed by dividing the total taxes levied by each level of government by the net total assessed value of tangible property within its jurisdiction.

[b] Includes the rates of special district taxes, which are not separately shown.

[c] County levies for school purposes, such as junior college tuition and countywide school levies, are included with school district levies.

[d] Computed by dividing city tax levies by the assessed value of tangible property inside cities as shown on county assessment rolls. Slightly lower rates would result from the use of assessed values as shown on city assessment rolls in the cities which do their own assessing. For example, in 1962–63, the average city rate was $1.54 when computed by the latter method.

[a] Includes utility roll, and locally-assessed secured and unsecured rolls at county assessment levels.
[b] Conuty levies for school purposes such as junior college tuition and countywide school levies, are included with school levies.
[c] Excludes special assessments levied on limited categories of property to finance activities from which owners of such properties derive special benefits.
[d] Numbers may not add to totals because of rounding.
[e] Computed by dividing total levies by the assessed value and multiplying by 100.

1967–68	5,024,182	4,796,701	6,149,640

[a] The information in the series is not strictly comparable. For the fiscal years through 1952–53 information is taken from the report prepared by counties, including only selected districts and not, in all cases, all of the information concerning the activities of a given district. For the fiscal years 1953–54 to date, the information is taken from separate reports of the financial transaction of districts. For districts other than school districts, the types of districts included were increased from fiscal year 1953–54 through 1955–56 as the program of the reporting for districts was expanded. The figures for bonded indebtedness include time warrants as well as certain long term contractual obligations between special districts and the Federal Bureau of Reclamation.

[b] Indebtedness for school and special districts from fiscal year 1953–54 to date include school purpose bonds which are an obligation of the City and County of San Francisco and not of the school district. Listing within this table is for information purposes only. For 1955–56, $43,147,000; 1960–61, $44,990,000; 1961–62, $44,225,000; 1962–63, $38,690,000; 1963–64, $33,015,000; 1964–65, $29,275,000; 1965–66, $24,570,000; 1966–67, $24,285,000; 1967–68, $28,480,000.

Office of State Treasurer

SECTION P.

ELECTIONS

Information relating to registrations and voting is presented in this section. In interest of space the data are limited to registrations, by principal political parties, the total vote cast, and a statement of the vote for major candidates for the offices of President, United States Senator from California, and the constitutional officers of this State. A complete accounting of registrations, the vote for all candidates (including representatives in Congress, State senators, assemblymen and judicial officers) and the vote cast for and against all ballot propositions is given by the Secretary of State in *Statement of Vote*, a booklet issued after each primary and general election.

All eighty members of the Assembly and all forty State senators were elected in 1966. Senators from odd-numbered districts, 1 through 39, were elected for a 2-year term. In 1968 they were elected for 4-year terms. Senators from even-numbered districts, 2 through 40, were elected for 4-year terms, their next election being in 1970. Thus, in 1968, one-half of the senators were elected for 4-year terms. Constitutional officers are elected for four-year terms in the even numbered years which are not leap years. There is a vote on high elective office, either presidential or gubernatorial, at each general election.

According to reports of the United States Bureau of the Census, there were 7,092,000 civilians in California aged 21 years and over on April 1, 1950. Registrations for the general election of that year totaled 5,244,837 and there were 3,845,757 votes cast. Registration for the general election of 1968 totaled 8,587,673 and there were 7,363,711 votes cast. It must be recognized that civilian population and registrations are not entirely comparable. Some individuals of proper age do not possess other voting qualifications and members of the Armed Forces may vote, if they have the residence and other qualifications. However, these population figures provide a general background against which to interpret registration and voting data.

TABLE P-1

REGISTRATION AND VOTE CAST IN CALIFORNIA, 1948–68

Secretary of State

SECTION Q.

COMPARATIVE STATISTICS

This section compares California with the other 49 states and the entire United States for several major economic indicators: resident population, nonagricultural employment, hours and earnings in manufacturing, personal income, defense-aerospace contracts, manufacturing activity, wholesale and retail trade, selected services, and agriculture.

Population data are summarized from the Bureau of the Census, *Current Population Reports* (Series P-25). Employment and hours and earnings series are taken from *Employment and Earnings*, released by the Bureau of Labor Statistics. Personal income data were published in the August 1969 issue of the *Survey of Current Business*. Defense-aerospace contracts appear in the Department of Defense (DOD) *Prime Contract Awards by State* (quarterly) and the National Aeronautics and Space Administration (NASA) *Annual Procurement Report*. Data for the manufacturing, trade and service categories are taken from publications covering the 1963 Census of Business, conducted by the Department of Commerce, Bureau of the Census and the 1967 Census of Manufactures. More detailed information is available by referring directly to the Census reports. Cash farm receipts are published in the *Farm Income Situation* of the U.S. Department of Agriculture.

These tables are not meant as an exhaustive comparison of California with other states, but are designed to illustrate the relative position of the State in several of the more important economic sectors.
